the most thorough treatment of its subject available this book introduces and analyses the international tax issues relating to international manufacturing and distribution activities extending from the tax regime in the country where the manufacturing activities are located through to regional purchase and sales companies to the taxation of local country sales companies the analysis includes the domestic tax laws relating to manufacturing and distribution company profits as well as international tax issues relating

to income flows and the payment of dividends among the topics and issues analysed in depth are the following foreign tax credits taxation in the digital economy tax incentives intellectual property group treasury companies mergers and acquisitions leasing derivatives controlled foreign corporation provisions vat and customs tariffs free trade agreements and customs unions transfer pricing role of tax treaties hedging related accounting issues deferred tax assets and liabilities tax risk management supply chain management depreciation allowances and carry forward tax losses the book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples detailed up to date attention is paid to the oecd action plan on base erosion and profit shifting beps and other measures against tax avoidance as a full scale commentary and analysis of international taxation issues for multinational manufacturing groups including in depth consideration of corporate structures tax treaties transfer pricing and current developments this book is without peer it will prove of inestimable value to all accountants lawyers economists financial managers and government officials working in international trade environments

since its inception some 40 years ago petroleum specific taxation in the uk has been subject to numerous modifications often these modifications were brought into place not only to sufficiently incentivise the investors but also to capture a fair share for the government however it is evident from the frequency of changes that finding the right balance between these two aims is no easy matter such a balance and the consequent fiscal stability is necessary for the long term relationship between the parties to endure to their mutual benefit still it does not take much for one or other party to feel that they are out of balance as a consequence one party feels that the other party is taking an undue proportion of the value generated and that they are losing out yet achieving that balance and fiscal stability is possible to understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime this approach is further complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework this latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to

further reactive amendments and revisions to the fiscal regime in the future

banking is an increasingly global business with a complex network of international transactions within multinational groups and with international customers this book provides a thorough practical analysis of international taxation issues as they affect the banking industry thoroughly explaining banking's significant benefits and risks and its taxable activities the book's broad scope examines such issues as the following taxation of dividends and branch profits derived from other countries transfer pricing and branch profit attribution taxation of global trading activities tax risk management provision of services and intangible property within multinational groups taxation treatment of research and development expenses availability of tax incentives such as patent box tax regimes swaps and other derivatives loan provisions and debt restructuring financial technology fintech group treasury interest flows and thin capitalisation tax havens and controlled foreign companies and taxation policy developments and trends case studies show how international tax analysis can be applied to specific examples the organisation for economic co operation and development base erosion and profit shifting oecd beps measures and how they apply to banking taxation are discussed the related provisions of the oecd model tax convention are analysed in detail the banking industry is characterised by rapid change including increased diversification with new banking products and services and the increasing significance of activities such as shadow banking outside current regulatory regimes for all these reasons and more this book will prove to be an invaluable springboard for problem solving and mastering international taxation issues arising from banking the book will be welcomed by corporate counsel banking law practitioners and all professionals officials and academics concerned with finance and its tax ramifications
