now in paperback the oxford textbook of cognitive neurology and dementia covers the dramatic developments that have occurred in the basic neuroscience and clinical research in both cognitive neurology and dementia in an integrated fashion the text is firmly based on the clinical approach to the patient with cognitive impairment and dementia while also providing the essential background scientific knowledge that is fundamental to clinical practice divided into three main sections this book combines the basic science section 1 with different types of cognitive deficit or neuropsychological presentation section 2 and disease specific chapters section 3 with

contributions from a range of international experts this is essential reading for clinicians with an interest in cognition and dementia including neurologists geriatricians and psychiatrists it provides a powerful means of bringing together different aspects of conceptual understanding and factual knowledge in a way that usually can only come after many years in the field

the impact of training or experience is not the same at all points in development children who receive music lessons or learn a second language before age 7 8 are more proficient as adults early exposure to drugs or trauma makes people more likely to become addicted or depressed later life rat pups exposed to specific frequencies from 9 13 days post partum show expanded cortical representations of these frequencies young birds must hear and copy their native song within 1 2 months of birth or they may never learn it at all these are examples of sensitive periods developmental windows where maturation and specific experience interact to produce differential long term effects on the brain and behavior while still controversial evidence for the existence of sensitive periods has grown as has our understanding of the underlying mechanisms of brain plasticity behavioral evidence from studies of language psychopathology or vision in humans has been complemented by evidence elucidating molecular gene and hormonal mechanisms in animals it has been proposed that sensitive periods can be both opened and closed by specific experience and that there are multiple overlapping sensitive periods that occur throughout development as functions come on line it is also likely that experience dependent behavioral or brain plasticity accrued during one sensitive period can serve as a scaffold on which later experience and plasticity can build based on current knowledge there are a number of broad questions and challenges to be addressed in this domain these include generating new information about the neurobiological mediators of structural and functional changes proposing models of brain development that will better predict when sensitive periods should occur and what functions are implicated investigation of the interaction between experience during a sensitive period and pre existing individual differences and the relationship between experience during a sensitive period and on

going experience the goal of this research topic is to bring together scientists in different fields whose work addresses these issues including animal and human developmental neuroscience language and cognitive development education developmental psychopathology and sensory neuroscience

in this definitive new text the major medicines devices and vaccines used by women worldwide are brought together for the first time in a single volume written and edited by international experts with an evidence based approach the book offers a comprehensive summary of all the key areas of women s medicines in the first part issues relating to female drug exposure and considerations for prescribing for subgroups of women for example during pregnancy and lactation are presented in the context of contemporary clinical practice in the second part specific groups of pharmaceutical products are reviewed including oral contraceptives emergency contraception treatment of chronic pelvic pain hormone replacement therapy bisphosphonates herbal medicines for women contraceptive devices and human papilloma virus hpv vaccines every chapter reviews and summarises the efficacy and safety of each group of products and concludes with a useful set of clinical take home messages in the third part broader perspectives are presented from a primary care overview of prescribing for women through to regulatory political and religious aspects including issues with women s medicines in developing countries the final two chapters focus on risk communication and conclude that women themselves should be placed at the centre of all discussions about their medicines the book is aimed at prescribers other healthcare professionals and students in the field of women s health throughout the world it is an extremely valuable resource for all in clinical practice for students of medicine nursing pharmacy and related sciences and also for those in medicines regulation pharmacovigilance and the pharmaceutical industry

after you get a bump on the head does it feel like everything has gone wrong in your life do you feel like everything you do makes you worse are you stressed out that your doctor does not know why your headaches get worse when you play and they never go away if the answer is yes you are like so

many of my patients from everyday people to professional athletes who are frustrated fed up and want to get answers for why they feel so bad after they get hit in the head they are tired of going to er or urgent care for relief they have taken the recommended drugs they ve been listening to coaches that say you re okay it s just a bruise now get in there and play and parents who do not know what to do or who to turn to for answers nobody has told them what they can and cannot do and whatever they do it makes them worse when all else fails they turn on themselves with a self deprecating attitude for poor implementation lack of discipline and lack of willpower but that s all about to change doc when can my kid play is about helping people take charge of their recovery from a concussion it is unique in its use of simple effective diagnostic capabilities that are readily available but not very well known or not favored or advertised in mainstream pharmaceutical driven health care doc when can my kid play is based on over forty years of taking care of professional college and high school level athletes who have hit their heads people who have been in car accidents mothers who have hit their heads while nursing their babies people who have fallen walking their dog or just getting up in the middle of the night to go to the bathroom and hitting their head while falling these patients received the standard level of care from their team the hospital er department or from clinics positioned as specializing in sports medicine these people in all walks of life who sustained head trauma continue to have life altering problems and are looking for help your search for answers of how to get help and what to do will be answered in doc when can my kid play
