the demo docs system of instruction replicates the classroom experience by providing more i get it moments outside of class we ve talked to tons of poa instructors and our editors have even taken the accounting course numerous times to figure out the following issue in this course that is consistent students understand or get it right after you do a problem in class but as soon as they leave class with each passing hour their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help or they just quit and get behind in the course on top of this you can end up getting behind in the course as well in order to keep everyone on track the demo docs system helps to recreate the i get it moments outside of class keeping both you and the students on track

winner of the 2003 shingo prize reorganizing work processes into cells has helped many organizations streamline operations shorten lead times increase quality and lower costs cellular manufacturing is a powerful concept that is simple to understand however its ultimate success depends on deciding where cells fit into your organization and then applying the know how to design implement and operate them reorganizing the factory presents a thoroughly researched and comprehensive life cycle approach to competing through cellular work organizations it takes you from the basic cell concept and its benefits through the process of justifying designing implementing operating and improving this new type of work organization in offices and on the factory floor the book discusses many important technical dimensions such as factory analysis cell design planning and control systems and principles for lead time and inventory reduction however unique to the literature it also covers in depth the numerous managerial issues that accompany organizing work into cells in most implementations performance measurement compensation education and training employee involvement and change management are critically important these issues are often overlooked in the planning process yet they can occupy more of the implementation time than do the technical aspects of cells includes why do cells improve lead time quality and cost planning for cell implementation justifying the move to cells strategically and economically designing efficient manufacturing and office cells selecting and training cell employees compensation system for cell employees performance and cost

measurement planning and control of materials and capacity managing the change to cells problems in designing implementing and operating cells improving and adapting existing cells structured frameworks and checklists to help analysis and decision making numerous examples of cells in various industries
