recycling is good isn t it in this visionary book chemist michael braungart and architect william mcdonough challenge this status quo and put forward a manifesto for an intriguing and radically different philosophy of environmentalism reduce reuse recycle this is the standard cradle to grave manufacturing model dating back to the industrial revolution that we still follow today in this thought provoking read the authors propose that instead of minimising waste we should be striving to create value this is the essence of cradle to cradle waste need not to exist at all by providing a framework of redesign of everything from carpets to corporate campuses mcdonough and braungart make a revolutionary yet viable case for change and for remaking the way we make things

from the authors of cradle to cradle we learn what s next the upcycle the upcycle is the eagerly awaited follow up to cradle to cradle one of the most consequential ecological manifestoes of our time now drawing on the green living lessons gained from 10 years of putting the cradle to cradle concept into practice with businesses governments and ordinary people william mcdonough and michael braungart envision the next step in the solution to our ecological crisis we don t just use or reuse and recycle resources with greater effectiveness we actually improve the natural world as we live create and build for mcdonough and braungart the questions of resource scarcity and sustainability are questions of design they are practical minded visionaries they envision beneficial designs of products buildings and business practices and they show us these ideas being put to use around the world as everyday objects like chairs cars and factories are being reimagined not just to sustain life on the planet but to grow it it is an eye opening inspiring tour of our green future as it unfolds in front of us the upcycle is as ambitious as such classics as rachel carson s silent spring but its mission is very different mcdonough and braungart want to turn on its head our very understanding of the human role on earth instead of protecting the planet from human impact why not redesign our activity to improve the environment we can have a beneficial sustainable footprint abundance for all the goal is within our reach

michael braungart and william mcdonough propose a plan for our planet in this stunning new edition of their radical ecological manifesto this book proposes a new vision for modern industry instead of our current wasteful and polluting methods of manufacturing we could be taking nature as a model for making things with the right redesign objects that have come to the end of their useful lives should provide the basis for something new in designing and producing products we need to stop worrying about being less bad and start finding ways of actually being good patterns of life special editions of groundbreaking science books
