recycling is good isn't it in this visionary book chemist michael braungart and architect william mcdonough challenge this status quo and put forward a manifesto for an intriguing and radically different philosophy of environmentalism reduce reuse recycle this is the standard cradle to grave manufacturing model dating back to the industrial revolution that we still follow today in this thought provoking read the authors propose that instead of minimising waste we should be striving to create value this is the essence of cradle to cradle waste need not to exist at all by providing a

framework of redesign of everything from carpets to corporate campuses mcdonough and braungart make a revolutionary yet viable case for change and for remaking the way we make things

from the authors of cradle to cradle we learn what's next the upcycle the upcycle is the eagerly awaited follow up to cradle to cradle one of the most consequential ecological manifestoes of our time now drawing on the green living lessons gained from 10 years of putting the cradle to cradle concept into practice with businesses governments and ordinary people william mcdonough and michael braungart envision the next step in the solution to our ecological crisis we don't just use or reuse and recycle resources with greater effectiveness we actually improve the natural world as we live create and build for mcdonough and braungart the questions of resource scarcity and sustainability are questions of design they are practical minded visionaries they envision beneficial designs of products buildings and business practices and they show us these ideas being put to use around the world as everyday objects like chairs cars and factories are being reimaged not just to sustain life on the planet but to grow it it is an eye opening inspiring tour of our green future as it unfolds in front of us the upcycle is as ambitious as such classics as rachel carson's silent spring but its mission is very different mcdonough and braungart want to turn on its head our very understanding of the human role on earth instead of protecting the planet from human impact why not redesign our activity to improve the environment we can have a beneficial sustainable footprint abundance for all the goal is within our reach

green technology an a to z guide explores the essential role of technology and its most recent developments toward a sustainable environment twofold in its definition green technology includes the changing of existing technology toward energy conservation as well as the creation of new clean technology aimed at utilizing renewable resources with a primary focus on waste management the volume presents more than 150 articles in a to z format featuring such disciplines as nanoscience biochemistry information technology and environmental engineering scholars and experts in their fields present a full range of topics from applications of green technology to the green grid global consortium to membrane technology and water purification systems to waste to energy technology this work culminates in an outstanding reference available in both print and electronic formats for academic university and public libraries vivid photographs searchable hyperlinks an extensive resource guide numerous cross references and a clear accessible writing style make the green society volumes ideal for classroom use as well as for research
