imaginary creatures depicted in a people's lower mythology are one of the most important phenomena in their belief systems this is because the common folk in particular must strive to maintain harmonious relations with these creatures a continuous process that permeates many aspects of their everyday lives and requires the intercession of a special person in the community who acts as the medium of communication between them the subject of maximo d ramos's work is the creatures of philippine lower mythology as this level of folklore is called in undertaking this study dr ramos directed his efforts to two principal tasks 1 making a taxonomic classification of all the beings which in his opinion fall within the framework of the problem as found in philippine folk beliefs and 2 correlating the implications of these beliefs in terms of these classifications to education particularly on the elementary level the taxonomic classification is intended to help clear up the confusion that attended earlier studies of these creatures this is indeed the first attempt to

systematize the identities of these philippine mythological beings for the benefit of folklore scholarship more specifically ramos writes where names traits and functions appear to have become confused through the process of transfer that constantly occurs in traditional lore it was thought fruitful to point these out and then attempt to account for them in spite of the very extensive christianization of the filipinos particularly the lowlanders these mythical entities still persist in their traditional belief systems hence the student of folk traditions cannot ignore them if he is to achieve greater relevance in his studies little by little the perspective from which these creatures have been traditionally viewed is bound to change until they are accepted as part of our cultural heritage this change is bringing about an understanding of these creatures function in our society the present work is primarily taxonomic in nature but it sheds light into many of the dark corners of philippine folklore studies and brings to the reader a fuller understanding of the most maligned inhabitants of the philippine other world herein lies the major contribution of dr ramos a basic recognition and a deeper insight into the cultural heritage of the filipino

the voluminous book provides a range of international theories and methodologies in analytical folklore investigations and a classification scheme based on genre is offered as the system of taxonomy for philippine traditional materials lopez counts on the regional folklorists to refine the classification according to the texts of their respective areas the different genres too are explained and examined in another part of lopez s study the reader will definitely find interesting and useful the illustrative examples for each genre

the aswang complex in philippine folklore with illustrative accounts in vernacular texts and translations this book is a bold attempt to present to the reader and to students of filipino society and culture one of the dominant filipino beliefs the aswang for some strange reason the belief has never been explored for its usefulness in the field of literature or social studies even educators shy away from it branding the belief as superstitious and therefore hot to be perpetuated while this view is entertained however there is continued use in the schools including the nursery schools of western tales like hansel and gretel rapunzel snow white and so forth dealing with witches dwarfs and other people of lower mythology it is sad to note that while we accept these stories as entertaining to our children we reject our own folktales about equivalent characters as superstitious and undesirable it is about time that we changed our perspective that we accepted our own literary heritage and used it if we are to make education meaningful to our children maximo d ramos has provided us with one way to achieve this of course the present volume is only one of his many works on philippine folklore while he presents the materials in this book as folklore these can also be regarded as ethnographic data in that they deal with one of the dominant aspects of filipino folk culture the aswang belief may be viewed as socially functional in many communities our own field notes on the subject matter indicate that aswang tales are used by many people as a medium of social control for example when a child frets at night or becomes unruly during the day adult members of the

family or sibling caretakers generally use the aswang belief as a means of quieting the child or of disciplining him when one wishes to protect his fields from unnecessary trespass by others all he has to do is make it known that an aswang haunts the place and no one will dare enter the premises especially at night deviant behavior is also handled through avoidance and the aswang label is handy for this purpose once the label is set deviants are either coerced into conformity to what is acceptable behavior or are effectively deprived of their legitimate status in the community thus seen it is understandable that the aswang belief has persisted in our society over such a long period of time
