policing does not happen in a vacuum the mood viewpoints and stresses of society impact how policing occurs and how it is perceived starting in june and july 2020 the nation saw weeks of protests civil disturbances and riots that were specifically directed against the police this most recent

round of public unrest was sparked by the senseless needless and improper death of George Floyd. Having seen similar deaths of Black males while involved with police officers, the nation had had enough and demands for something to be done were far reaching and involved more than just the Black community or a few protestors. An all encompassing variety of people either joined the protests or supported them. People of all demographic backgrounds, economic levels, and professions resoundingly condemned the actions of the officers in the Floyd incident. Even police officers and police leaders. Policing in America needs to change. Scott Cunningham offers advice on a wide variety of policing aspects including but not limited to leadership, training, equipment, and weapons. Government's roles and responsibilities, citizen and community participation, investigation procedure, police culture, and attitudes. The list goes on. Looking at policing from multiple angles, he provides implementable recommendations for up and down the chain of command that individually and collectively could enhance policing and improve the quality of life for everyone.

Examine historical, current, and future issues. Key topics: five general areas of policing are examined: 1. selection, recruitment, and training; 2. new philosophies and strategies; 3. police management and operations; 4. police misconduct and accountability; 5. the future of policing. Intro to policing issues in policing.

This book examines the problem of police discipline from the collective perspective of professional law enforcement leaders. It offers the reader practical, not theoretical, solutions in dealing with problem employees and misconduct incidents. It reflects the collective experience and dedication of a highly experienced group of Illinois police chiefs and sheriffs, both in large and small departments, in urban and rural communities. Law enforcement executives developed the ideas, solutions, and practical suggestions throughout the book. The case study approach used in the book promotes deliberative exchange and contributes to further understanding of the complex issues. Seventeen cases of personnel problems confronted by law enforcement administrators are included. Some of these include minority rights, mental health, sick time, abuse, domestic violence, insubordination, blue flu, prisoner abuse, improper political involvement, alcoholism, and others. The details of each case are given, followed by a summary of major issues and dilemmas that each case presents. Legal considerations in each case are summarized to provide the reader with a complete foundation for further analysis. It is intended to be used by police educators, trainers, students, and practitioners to facilitate learning in an interactive group discussion model.

Since the complexity of police services does not lend itself to standardized performance measures, measurement techniques should be designed to inform more about what police do and how they affect their communities. This report reviews conventional police measurement practices and offers ways to improve the management value of performance information. Traditional performance

measurement has emphasized the measurement of individual departments effectiveness in preventing crime this approach fails to consider the broad range of other police duties citizens expectations of police and how police activities produce social change police can be evaluated in terms of efficiency effectiveness equity and accountability but citizens disagree about which of these performance criteria are the most important because community police problems are too diverse instead of developing uniform inflexible performance standards to apply globally to entire departments evaluators should ask more detailed questions about common police processes and their results sketchy knowledge of how policing works now produces many hypotheses but rarely standards worthy of emulation evaluators should develop better theories about police functions obtain more reliable data and control data collection costs with the aid of police managers so that measures inform departmental policymakers tables diagrams and 197 references are given appendixes include police services study data and a list of problem codes
