drawing on the latest scientific research this handbook introduces the essentials of sport specific strength and conditioning programme design for over 30 different sports enhanced by extensive illustrations and contributions from more than 70 world leading experts its chapters present evidence based best practice for sports including football rugby tennis hockey basketball rowing boxing golf swimming cycling and weightlifting as well as a variety of wheelchair sports every chapter introduces the fundamental requirements of a particular sport such as the physiological and biomechanical demands on the athlete and describes a sport specific fitness testing battery and exercise programme additional chapters cover the adaptation of programme design for special populations including female athletes young athletes and athletes with a disability drawing on the experiences of olympic and paralympic coaches and trainers it offers original insights and practical advice from practitioners working at the highest level innovative comprehensive and truly international in scope the routledge handbook of strength and conditioning is vital reading for all strength and conditioning students and an invaluable reference for strength and conditioning coaches and trainers

the first step in building anything is to start with a solid foundation that is as true for strength training as it is for construction a program built on sound principles anchored by science and proven effective time and again will reward you with true and tangible results and lifetime of lifting success focusing on the most essential information you need to know to start a safe and effective strength training program foundational strength provides step by step explanations of the key elements and phases of the four essential lifts squat bench press deadlift and overhead press each lift is accompanied by photos that walk you through the lift from start to finish detailing the proper mechanics and purpose of the lift variations for each lift are included helping you identify your individual starting point to ensure success and common errors are identified to help avoid injury warm up exercises ensure your body is ready for each main lift and an assortment of accessory exercises helps you progress over time the book also takes the guesswork out of creating workouts providing the basics of programming and information on how to create your own programs based on your situation needs and goals more than just a bullet point list of movement descriptions

foundational strength gives you a personal coach to guide you on the first steps of your lifting journey get the know how you need to build confidence and success in the gym earn continuing education credits units a continuing education exam that uses this book is also available it may be purchased separately or as part of a package that includes both the book and exam

statistical science as organized in formal academic departments is relatively new with a few exceptions most statistics and biostatistics departments have been created within the past 60 years this book consists of a set of memoirs one for each department in the u s created by the mid 1960s the memoirs describe key aspects of the department s history its founding its growth key people in its development success stories such as major research accomplishments and the occasional failure story phd graduates who have had a significant impact its impact on statistical education and a summary of where the department stands today and its vision for the future read here all about how departments such as at berkeley chicago harvard and stanford started and how they got to where they are today the book should also be of interests to scholars in the field of disciplinary history

offering practical stigma and discrimination reduction programs in a range of domains including mental health disability ethnicity and sexuality this book is the answer to what can we do to improve interpersonal relationships by reducing societal stigma towards social groups that are prime targets of prejudice in this volume researchers from four continents share empirically supported stigma reduction programs that capitalize on creativity and psychological science the programs capture a range of populations including high school and college students healthcare providers war survivors sexual assault survivors business professionals and community members with a focus on controversial topics in society today including racism sexism ageism ableism and classism as well as stigma of mental health and body image innovative and unexpected methods of interventions are brought to life in the collected chapters from world leading experts the applications of theater game playing text messaging and social media as well as new formulations of educational workshops and communication strategies shed new perspectives on how all of us can use accessible tools to make positive and productive changes on societal attitudes this is an essential reading for professionals academics and students of psychology business hr mental health counseling and social work especially those interested in stigma reduction

although studies have suggested that mindfulness based interventions might be effective in enhancing military readiness

and resilience this has not been rigorously evaluated this report presents results from a systematic review and meta analyses of research examining how mindfulness meditation affects 13 performance related outcomes of interest to the u s army and broader military the authors supplemented the systematic review by examining how mindfulness meditation could support stress management and exploring characteristics of selected mindfulness programs the goal was to develop recommendations for mindfulness meditation programs for soldiers should the army choose to implement such programs in the future findings suggest that mindfulness may improve some aspects of attention and emotion regulation impulsivity and work related morale and social support the available evidence does not suggest that mindfulness improves other outcomes of interest to the army notably mindfulness meditation programs reduce stress and may reduce parental stress which could benefit army families yet more research is needed to identify best practices for implementing mindfulness programs in the military the authors recommend conducting high quality evaluations of mindfulness meditation with soldiers and assessing the effect of mindfulness meditation on military families

a few clear factors are associated with living longer and healthier such as higher levels of physical activity good sleep patterns and proper nutrition however despite all the advances that have been made to increase the general population s physical activity improve their sleep patterns and boost their nutritional habits there is still a lot to be done this research topic aims to address the topic of healthy ageing and will consider manuscripts focused on the effects of improving these factors in all ages from childhood to old age we are mainly interested in questions of broader interventions at the individual home settings group school work and gerontology settings and societal level community based settings we also welcome papers investigating the short and long term effects of environmental factors on physical changes in children working and old age populations and their development correlational and survey studies examining the issues mentioned above are welcome
