the 29 papers in this volume cover a wide variety of topics ranging from the glottalic theory and lachmann s law to the hermeneutic analysis of text structure in tacitus germania the volume focuses on three themes specifically the morphology and semantics of lexical formation the internal and external syntax of the noun phrase and the pragmatics of textual cohesion the papers are descriptive rather than historical in approach and most of the contributors are latinists by training for this reason the volume will be of interest not only for philologists and general linguists but also for those working with the latin language

each vol contains a review of the previous year and a preview of the current year

the increase in our knowledge of the solar system during the five years since the author last revised this book 1963 greatly exceeds that in the previous two decades the program of the u s national aeronautics and space administration and the space program of the u s s r have been prime contributors to this rapid progress but the impetus has carried over to groundbased studies of the moon and planets as well the advances in radio and radar astronomy alone are striking and are continuing at an accelerating pace this third edition of mr whipple s popular and authoritative book is thoroughly revised in light of this new knowledge the most extensive revisions are in the chapters on the moon mars and venus the members of the solar system on which the various space programs have concentrated the author has included many new and dramatic illustrations in this third edition

among them photographs taken from u s and russian space craft there are striking photographs of the moon with close up views of its surface texture pictures of mars taken from mariner iv and radar pictures of venus that see through that planet s obscuring cloud layer the book is written in nontechnical language and with a lucid witty style that is readily understandable to the interested layman mathematics has been avoided and scientific methods and processes are described in simple terms in presenting the latest information about the planets and their moons mr whipple discusses their origin and evolution motions atmospheres temperatures surface conditions the environment essential for life as we know it and the possibilities of life outside the earth he concludes with a discussion of current theories about the origin of the solar system
