this second english edition is based on the third german edition in view of most recent technological advances it has become necessary in many instances to supplement the second german edition and to revise some parts completely in addition to piezo electric methods others are now also extensively discussed in chapter 8 as for the intensity method ultrasonic holo graphy is treated in the new section 9 4 in part b for reasons of syste matics the resonance method has been included under transit time methods it appeared necessary to elaborate in greater detail the defini tion of the properties of pulse echo testing equipment and their measure ments 10 4 the more recent findings of pulse spectroscopy 5 6 and sound emission analysis 12 are mentioned only in passing because their significance is still controversial apart from numerous additions particularly those concerning automatic testing installations part c also contains a new chapter which deals with tests on

nuclear reactors 28 as well as a brief discussion of surface hardness tests 32 4 it became impossible to include a critical analysis of the principal standards in chapter 33 a few are mentioned however where the most important subjects e g the testing of welded joints in chapter 26 are discussed while others are only tabulated in chapter 33 the present vastly increased literature made bibliographical selection rather difficult consequently we wish to apologize to any authors whose reports may have been omitted because of limitations governing the size of this volume

this volume represents a unique addition to the growing body of empirical literature on materials development adopting a reverse approach to the topic rather than applying theory to practice practitioners and researchers from 11 countries reappraise applied linguistics theories through practice the book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes each chapter surveys the relevant literature such as task based learning and language and culture describes a specific research project reports the results of the project and discusses the implications of these results for the development of materials both in the local context and in general after each section there are editorial comments highlighting the issues emerging from the research and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for l2 learners the book will be suitable for teachers materials developers academics and students in post graduate courses in applied linguistics in tefl tesol and in the teaching of other languages as an l2
