today a multinational video game developer sega was the first to break nintendo s grip on the gaming industry expanding from primarily an arcade game company to become the dominant game console manufacturer in north america a major part of that success came from the hard work and innovation of its subsidiary sega of america who in a little more than a decade wrested the majority market share from nintendo and revolutionized how games were made drawing on interviews with nearly 100 sega alumni this book traces the development of the company revealing previously undocumented areas of game making history including sega s relationship with tonka the creation of its internal studios and major breakthroughs like the sega channel and heat network more than 40 of the company s most influential games are explored in detail

cognitive neuropsychological research studies of people with cognitive deficits have typically been directed either at investigating methods of intervention or at furthering our understanding of normal and impaired cognition this book reports on research that combines these goals using studies that use intervention as a tool for investigating hypotheses about the functioning of the human cognitive system the introductory chapter discusses some of the unique and more general difficulties that this approach faces while the five reports describe intervention studies with children and adults with cognitive impairments studies which investigate current theories of cognition the studies demonstrate that the use of intervention to study cognition is a promising and valuable methodology aiming to promote wider use of these combined methods this book makes it clear that while the approach faces various methodological and interpretative challenges it has the advantage of providing advances on issues of theory while at the same time providing treatment to participants and bringing together what have been largely separate research traditions this book was originally published as a special issue of cognitive neuropsychology

the book discusses how the two interrelated questions of biopolitics and ethics influence discursive and non discursive practices in the fields of international relations and strategic studies the book debates the following research question of how discussions on global regimes that rule human empowerment and human fragility in international and strategic arenas require the establishment of a complex relation between the contested concepts of biopolitics and ethics the book focuses on six main areas which are 1 the politics of in security 2 complex emergencies and contemporary terrorism 3 health risk and population management 4 environment and climate change 5 the politics of memory and trauma and 6 migration and refugee flows the usefulness of the book derives from critically

questioning how international public policies in sensitive areas like terrorism global health global migration flows or humanitarian assistance are being built through global policy regimes and global discursive regimes

the purpose of this report is to provide information and analysis to government civil society and donors interested in improving the well being of the rural population of mon state myanmar specifically the report analyzes the different sources of income for rural households as well as their socioeconomic characteristics with a view to helping identify constraints on growth and potential pathways to improving incomes the overall picture that emerges is one of a struggling agricultural sector and an economy heavily dependent on services for local employment and on international migration for income the analysis is based on a sample of 1 632 rural households designed to be representative of rural households in mon state as a whole the survey included a household questionnaire and a community survey and gathered information on demographics all economic aspects of the household and access to infrastructure and services at the community level

value creation and its effects on transfer pricing and tax law emerging from the oecd g20 beps project a new somewhat fuzzy notion of value creation came to permeate not only transfer pricing language but also wider allocation rules and anti abuse provisions in international tax law the notion of value creation reframes the interpretation and application of the arm's length principle alp that is embedded in articles 7 and 9 of the oecd model convention this new value creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways situating such notions and this approach within the law of tax treaties and analyzing terms of the oecd transfer pricing guidelines alongside their factual context is the aim of this book here law students address transfer pricing and value creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy our ll m students were required to address issues not explored in legal research and to discuss factual topics relevant for transfer pricing all students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

exploring case studies from the first gulf war to the syria crisis this book discusses different approaches to the use of international law and the role it plays in international power politics analysis of the post cold war overseas military involvements of western powers has focused on their legality and legitimacy allowing for a conflation of the concepts and distracting from the true source of international legitimacy demonstrating compliance with international law can be helpful but it plays a secondary role to other more powerful considerations such as national interest and shared national security concerns exploring the key drivers for decision makers this book identifies the impact of previous

experience on the use of international law in the quest for legitimacy ahead of launching military action patterns in approach and of relations between close western allies in particular the uk and us are identified offering valuable lessons for future strategic decision making this book will appeal to scholars and students of international relations and international law think tanks focussing on international relations and the use of force and practitioners working in the realm of foreign policy with a focus on the un and international law will also be interested in the study and conclusions drawn

included the reports of the executive officers and for many years those of the educational and charitable institutions
