this incisive book deals with the use of the criminal law to enforce morality in particular sexual morality a subject of particular interest and importance since the publication of the wolfenden report in 1957 professor hart first considers john stuart mill s famous declaration the only purpose for which power can be rightfully exercised over any member of a civilized community is to prevent harm to others during the last hundred years this doctrine has twice been sharply challenged by two great lawyers sir james fitzjames stephen the great victorian judge and historian of the common law and lord devlin who both argue that the use of the criminal law to enforce morality is justified the author examines their arguments in some detail and sets out to demonstrate that they fail to recognize distinction of vital importance for legal and political theory and that they espouse a conception of the function of legal punishment that few would now share

does god s existence make a difference to how we explain morality mark c murphy critiques the two dominant theistic accounts of morality natural law theory and divine command theory and presents a novel third view he argues that we can value natural facts about humans and their good while keeping god at the centre of our moral explanations the characteristic methodology of theistic ethics is to proceed by asking whether there are features of moral norms that can be adequately explained only if we hold that such norms have some sort of theistic foundation but this methodology fruitful as it has been is one sided god and moral law proceeds not from the side of the moral norms so to speak but from the god side of things what sort of explanatory relationship should we expect between god and moral norms given the existence of the god of orthodox theism mark c murphy asks whether the conception of god in orthodox theism as an absolutely perfect being militates in favour of a particular view of the explanation of morality by appeal to theistic facts he puts this methodology to work and shows that surprisingly natural law theory and divine command theory fail to offer the sort of explanation of morality that we would expect given the

existence of the god of orthodox theism drawing on the discussion of a structurally similar problem that of the relationship between god and the laws of nature murphy articulates his new account of the relationship between god and morality one in which facts about god and facts about nature cooperate in the explanation of moral law

the past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of american law and the institutions of the liberal state in this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory

and theories of difference and critical race theory the authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of american law should take writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory a third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views the resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice a common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting radical critiques of the law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best

morality and the nature of law explores the conceptual relationship between morality and the criteria that determine what counts as law in a given society the criteria of legal validity is it necessary condition for a legal system to include moral criteria of legal validity is it even possible for a legal system to have moral criteria of legal validity the book considers the views of natural law theorists ranging from blackstone to dworkin and rejects them arguing that it is not conceptually necessary that the criteria of legal validity include moral norms further it rejects the exclusive positivist view arguing instead that it is conceptually possible for the criteria of validity to include moral norms in the process of considering such questions this book considers raz s views concerning the nature of authority and shapiro s views about the guidance function of law which have been thought to repudiate the conceptual possibility of moral criteria of legal validity the book then articulates a thought experiment that shows that it is possible for a legal system to have such criteria and concludes with a chapter that argues that any legal system like that of the united states which affords final authority over the content of the law to judges who are fallible with respect to the requirements of morality is a legal system with purely source based criteria of validity
