this book brings together the best of visible learning and the teaching of mathematics the chapters on learning intentions success criteria misconceptions formative evaluation and knowing thy impact are stunning rich in exemplars grounded in research about practice and with the right

balance about the surface and deep learning in math it's a great go-to book for all who teach mathematics. John Hattie, Laureate Professor, Deputy Dean of MGSE, Director of the Melbourne Education Research Institute, Melbourne Graduate School of Education, your blueprint to planning K-2 math lessons for maximum impact and understanding. Not sure of tomorrow morning's lesson plan or maybe you feel it isn't tailored enough for your students' needs? What do you do for that? And more help is here: the Mathematics Lesson Planning Handbook, Grades K-2, your blueprint for building cohesive lessons. Guides teachers step by step through the decision-making process of planning K-2 math lessons that are purposeful, rigorous, and coherent. Instructional experts Beth McCord, Kobett Ruth Harbin Miles, and Lois A. Williams streamline and deepen the lesson planning process, showing teachers how to access students' complex needs, clarify learning intentions, and select tasks that will best lead to student understanding of mathematical concepts and skills. Along the way, teachers create an individualized blueprint for planning K-2 math lessons for maximum student learning. The lesson planning process guides teachers to identify the mathematical content, language, and social learning intentions for a lesson or unit and connect goals to success criteria. Determine the purpose of a math lesson you're planning by distinguishing between conceptual understanding, procedural fluency, and transfer. Select worthwhile tasks and materials that make the best use of representations, manipulatives, and other instructional tools and resources. Choose the format of your lesson using reasoning and number routines, games, whole-class discussion, and pairs or small-group work. Anticipate student misconceptions and evaluate understanding using a variety of formative assessment techniques. Decide how you'll launch your lesson, facilitate questioning, encourage productive struggle, and close your lesson. Included is a lesson planning template and examples from kindergarten, first, and second-grade classrooms. Chapter by chapter, the decision-making strategies empower teachers to plan math lessons strategically to teach with intention and confidence and to build an exceptional foundation in math for all students.

a training programme around the national plan of action for small-scale fisheries. NPOASSF has been developed to support these processes at national level. This guide for trainers was developed to be used along with the rest of the training materials on how to develop and implement an NPOA SSF. NPOA SSF processes are unique in their kind because they ensure that the voices and concerns of small-scale fisheries are heard and allow them to actively participate in decision-making processes that shape their lives and livelihoods. In doing so, implementing an NPOA SSF is an effective way to align legal frameworks with the provisions of the voluntary guidelines for securing sustainable small-scale fisheries in the context of food security and poverty eradication. SSF guidelines unite social development with responsible fisheries, hence addressing the marginalization and vulnerability present in the sector, promoting a human rights-based approach.
