the aim of this edited collection of essays is to examine the relationship between private law and power both the public power of the state and the private power of institutions and individuals it describes and critically assesses the way that private law doctrines institutions processes and rules express moderate facilitate and control relationships of power the various chapters of this work examine the dynamics of the relationship between private law and power from a number of different perspectives historical theoretical doctrinal and comparative they have been commissioned from leading experts in the field

of private law from several different commonwealth jurisdictions australia the uk canada and new zealand each with expertise in the particular sphere of their contribution they aim to illuminate the past and assist in resolving some contemporary difficult legal issues relating to the shape scope and content of private law and its difficult relationship with power

modern international law is widely understood as an autonomous system of binding legal rules nevertheless this claim to autonomy is far from uncontroversial international lawyers have faced recurrent scepticism as to both the reality and efficacy of the object of their study and practice for the most part this scepticism has focussed on international law's peculiar institutional structure with the absence of centralised organs of legislation adjudication and enforcement leaving international legal rules seemingly indeterminate in the conduct of international politics perception of this institutional problem has therefore given rise to a certain disciplinary angst or self defensiveness fuelling a need to seek out functional analogues or substitutes for the kind of institutional roles deemed intrinsic to a functioning legal system the author of this book believes that this strategy of accommodation is however deeply problematic it fails to fully grasp the importance of international law's decentralised institutional form in securing some measure of accountability in international relations it thus misleads through functional analogy and in doing so potentially exacerbates legitimacy deficits there are enough conceptual weaknesses and blindspots in the legal theoretical models against which international law is so frequently challenged to show that the perceived problem arises more in theory than in practice

this book represents a unique contribution to comparative legal studies by presenting the results of an empirical research project on the use of foreign precedents in constitutional interpretation in 31 jurisdictions worldwide it expands and updates the outcomes presented in the previous successful book the use of foreign precedents by constitutional judges edited by tania groppi and marie claire ponthoreau and published in 2013 as volume 1 of the series hart studies in comparative public law this new research covering countries from all the continents with special attention to some of the emerging jurisdictions of the global south confirms that the practice of making explicit use of foreign precedents is still limited both quantitatively and qualitatively judicial dialogue only exists in common law jurisdictions and even there judicial bricolage is much more common than judicial comparativism since the previous edition this practice has gone hand in hand with new developments in constitutional law such as the democratic erosion and backsliding the emergence of populist movements the increasing role of regional human rights courts which in many cases overshadowed foreign sources and the end of a global vision of constitutionalism applying a quantitative and a qualitative analysis with the support of tables and data the book gives a more complete picture of the practice of citing foreign precedents in this new and challenging era resulting in essential reading for comparative and constitutional legal scholars
