1. **Integration of Contemporary Market Conditions** Damodaran recognizes the evolving landscape of markets characterized by increased volatility, low-interest-rate environments, and technological disruptions. The book discusses how these factors influence valuation models, especially for growth stocks and

companies in innovative sectors. 2. Expanded Coverage of Behavioral and Market Risks Understanding that markets are influenced by investor psychology and macroeconomic risks, the edition devotes more attention to risk assessment, including how to incorporate behavioral biases into valuation models. 3. Fundamentals of Valuation This section introduces the core concepts: - The purpose and importance of valuation. - The various types of assets and their valuation challenges. - The difference between intrinsic and relative valuation. It emphasizes understanding the economic rationale behind valuation models. 2. Discounted Cash Flow (DCF) Valuation A central component, DCF valuation entails estimating the present value of expected future cash flows.
