more than 50 years after it was first published, the concept of law remains the most important work of legal philosophy in the English-speaking world. In this volume, written for both students and specialists, 13 leading scholars look afresh at Hart's great book. Unique in format, the volume proceeds sequentially through all the main ideas in the concept of law. Each contributor addresses a single chapter of Hart's book, critically discussing its arguments in light of subsequent developments in the field. Four concluding essays assess the continued relevance for jurisprudence of the persistent questions identified by Hart at the beginning of the concept of law. The collection also includes Hart's answers to eight questions written in 1988 and never before published in English. Contributors include

timothy endicott richard hs tur pavlos eleftheriadis john gardner grant lamond nicos stavropoulos leslie green john tasioulas jeremy waldron john finnis frederick schauer pierluigi chiassoni and nicola lacey

this collection of essays is the outcome of a workshop with scott shapiro on the planning theory of law that took place in december 2009 at bocconi university it brings together a group of scholars who wrote their contributions to the workshop on a preliminary draft of shapiro s legality then after the workshop they wrote their final essays on the published version of the book the contributions clearly highlight the difference of the continental and civil law perspective from the common law background of shapiro but at the same time the volume tries to bridge the gap between the two the essays provide a critical reading of the planning theory of law highlighting its merits on the one hand and objecting to some parts of it on the other hand each contribution discusses in detail a chapter of shapiro s book and together they cover the whole of shapiro s theory so the book presents a balanced and insightful discussion of the arguments of legality

margaret gilbert offers an incisive new approach to a classic problem of political philosophy when and why should i do what the laws of my country tell me to do beginning with carefully argued accounts of social groups in general and political societies in particular the author argues that in central standard senses of the relevant terms membership in a political society in and of itself obligates one to support that society s political institutions the obligations in question are not moral requirements derived from general moral principles as is often supposed but a matter of one s participation in a special kind of commitment joint commitment an agreement is sufficient but not necessary to generate such a commitment gilbert uses the phrase plural subject to refer to all of those who are jointly committed in some way she therefore labels the theory offered in this book the plural subject theory of political obligation the author concentrates on the exposition of this theory carefully explaining how and in what sense joint commitments obligate she also explores a classic theory of political obligation actual contract theory according to which one is obligated to conform to the laws of one s country because one agreed to do so she offers a new interpretation of this theory in light of a theory of plural subject theory of agreements she argues that actual contract theory has more merit than has been thought though the more general plural subject theory is to be preferred she compares and contrasts plural subject theory with identification theory relationship theory and the theory of fair play she brings it to bear on some classic situations of crisis and in the concluding chapter suggests a number of avenues for related empirical and moral inquiry clearly and compellingly written a theory of political obligation will be essential reading for political philosophers and theorists
