in this book the author argues that moral principles are principles of rational choice according to the usual view of choice a rational person selects what is likely to give the greatest expectation of value or utility but in many situations if each person chooses in this way everyone will be worse off than need be instead professor gauthier proposes a principle whereby choice is made on an agreed basis of co operation rather than according to what would give the individual the greatest expectation of value he shows that such a principle not only ensures mutual benefit and fairness thus satisfying the standards of morality but also that each person may actually expect greater utility by adhering to morality even though the choice did not have that end primarily in view in resolving what may appear to be a paradox the author establishes morals on the firm foundation of reason

david gauthier s *morals by agreement* 1986 is the most complete and suggestive contractarian theory of morality since the work of rawls in this anthology a number of prominent moral and political philosophers offer a critical assessment of gauthier s theory and its three main projects developing a contractarian foundation for morality defending a theory of rational choice and supporting the claim that rationality requires one to keep one s agreements an introduction sets out gauthier s project while gauthier himself has the last word responding to the critiques this collection will interest moral and political philosophers social theorists and specialists in the philosophy and theory of law as well as management sciences

this book challenges assumptions that philosophers traditionally have made in setting out the demands of the skeptic who asks why be moral it aims to show the ways in which philosophers should broaden narrow and otherwise fine tune the skeptic s position so that a defeat of skepticism is complete

what does the idea of taking the point of view of the universe tell us about ethics the great nineteenth century utilitarian henry sidgwick used this metaphor to present what he took to be a self evident moral truth the good of one individual is of no more importance than the good of any other ethical judgments he held are objective truths that we can know by reason the ethical axioms he took to be self evident provide a foundation for utilitarianism he supplements this foundation with an argument that nothing except states of consciousness have ultimate value which led him to hold that pleasure is the only thing that is intrinsically good are these claims defensible katarzyna de lazari radec and peter singer test them against a variety of views held by contemporary writers in ethics and conclude that they are this book is therefore a defence of objectivism in ethics and of hedonistic utilitarianism the authors also explore and in most cases support sidgwick s views on many other key questions in ethics how to justify an ethical theory the significance of an evolutionary explanation of our moral judgments the choice between preference utilitarianism and hedonistic utilitarianism the conflict between self interest and universal benevolence whether something that it would be wrong to do openly can be right if kept secret how demanding utilitarianism is whether we should discount the future or favor those who are worse off the moral status of animals and what is an optimum population

michael moehler develops a novel multilevel social contract theory in contrast to existing theories in the liberal tradition it does not merely assume a restricted form of reasonable moral pluralism but is tailored to the conditions of deeply morally pluralistic societies which may be populated by liberal moral agents nonliberal moral agents and according to the traditional understanding of morality nonmoral agents alike moehler draws on the history of the social contract tradition especially the work of hobbes hume kant rawls and gauthier as well as on the work of some of the critics of this tradition such as sen and gaus moehler s two level contractarian theory holds that morality in its best contractarian version for the conditions of deeply morally pluralistic societies entails humane hobbesian and kantian moral features the theory defines the minimal behavioral restrictions that are necessary to ensure compared to violent conflict resolution mutually beneficial peaceful long term cooperation in deeply morally pluralistic societies the theory minimizes the problem of compliance in morally diverse societies by maximally respecting the interests of all members of society despite its ideal nature the theory is in principle applicable to the real world and for the conditions described most promising for securing mutually beneficial peaceful long term cooperation in a world in which a fully just society due to moral diversity is unattainable if rawls intention was to carry the traditional social contract argument to a higher level of abstraction then the two level contractarian theory brings it back down to earth

are moral principles actually principles of rational choice starting from the view that it is rational always to choose what will give one the greatest expectation of value or utility and the common counter claim that this procedure applied in many situations will actually leave people worse off than need be gauthier instead proposes a principle of cooperation whereby each must choose in accordance with a principle to which all can agree he shows that not only does such a principle ensure mutual benefit and fairness but also that each person may expect greater utility from actually adhering to a morality based on it even though his other choice did not have that specific end primarily in view in resolving what may appear to be a paradox he establishes morals on the foundation of reason

hannaford shows that doing reasoning and acting morally and being our moral anatomy or essential nature do not exist in a vacuum but are rooted in community in our relations with others moral reasoning he argues focuses on what we ought to do in a situation where we must consider the needs desires and expectations of others

in this collection of original essays on metaethics the nature of morality and the structure of moral reasoning are characterized the limits of justification in ethics are examined and the underlying rationale of moral philosophy is probed around mid century metaethics held centre stage in discussions of moral philosophy in anglo american and scandinavian philosophical environments during the 1970s its foundational position was challenged by developments within analytic philosophy itself by a renewal of systematic substantive ethics largely but not exclusively of a rawlsian inspiration and by a reinvigorated interest in substantive moral problems on the part of philosophers however as work went on here philosophers encountered problems concerning the methods of moral reasoning and the structure of justification of moral claims that were recognized to be metaethical this led to a renewal of metaethics now freed from its previously narrow linguistic focus and aprioristic restrictions the essays in this volume contribute both to this renewal and to a continued skeptical probing of the very rationale of moral philosophy
