james viscuglia ii a pioneer in day trading excellence with over 14 years of experience in the fast paced world of futures day trading james viscuglia has established himself as a leading authority in the industry as the founder of trading made easy james has dedicated his career to simplifying and revolutionizing the day trading process making it accessible to both seasoned professionals and complete beginners james s journey began with a passion for understanding market trends and leveraging advanced strategies to generate consistent results over the years he has honed his skills weathering market c and perfecting his approach to automated trading his expertise led to the development of a proprietary automated day trading software designed to eliminate the complexities of manual trading while maximizing probability through trading made easy james has helped countless individuals gain financial freedom by equipping them with cutting edge tools and personalized training his unwavering commitment to innovation coupled with his ability to demystify the trading process has earned him a stellar reputation among his peers and clients alike james viscuglia s mission is clear to empower aspiring traders to achieve success in the markets regardless of their level of experience his dedication expertise and passion for teaching make him a true trailblazer tradingmadeeasy com james viscuglia founded trading made easy in 2014 initially offering a manual day trading software however he quickly recognized that human emotions such as greed and fear often undermined success in the high stakes world of day trading this insight led to a pivotal innovation in 2018 trading made easy developed an automated day trading software designed to outperform human traders the software executes trades within milliseconds entering and exiting positions with unparalleled speed and precision all while eliminating emotional interference with a set daily goal the software consistently generates profits regardless of whether the market moves up or down to date it has delivered phenomenal results earning the trust of customers in nine different countries worldwide the success of this automated trading solution has solidified james viscuglia and trading made easy as pioneers in the futures day trading industry proving that automation free from human emotion can truly revolutionize trading trading made easy now has customers in nine different countries now the rest as they say is history

optimize the performance of your systems with practical experiments used by engineers in the world's most competitive industries in experimentation for engineers from a/b testing to bayesian optimization you will learn how to design, run and analyze an a/b test, break the feedback loops caused by periodic retraining of ml models, increase experimentation rate with multi armed bandits, tune multiple parameters experimentally with bayesian optimization, clearly define business metrics used for decision making, identify and avoid the common pitfalls of experimentation. Experimentation for engineers from a/b testing to bayesian optimization is a toolbox of techniques for evaluating new features and fine tuning parameters. You'll start with a deep dive into methods like a/b testing and then graduate to advanced techniques used to measure performance in industries such as finance and social media. Learn how to evaluate the changes you make to your system and ensure that your testing doesn't undermine revenue or other business metrics. By the time you're done, you'll be able to seamlessly deploy experiments in production while avoiding common pitfalls about the technology: does my software really work? Did my changes make things better or worse? Should I trade features for performance? Experimentation is the only way to answer questions like these. This unique book reveals sophisticated experimentation practices developed and proven in the world's most competitive industries that will help you enhance machine learning systems, software applications and quantitative trading solutions. About the book: Experimentation for engineers from a/b testing to bayesian optimization delivers a toolbox of processes for optimizing software systems. You'll start by learning the limits of a/b testing and then graduate to advanced experimentation strategies that take advantage of machine learning and probabilistic methods. The skills you'll master in this practical guide will help you minimize the costs of experimentation and quickly reveal which approaches and features deliver the best business results. What's inside: Design, run and analyze an a/b test, break the feedback loops caused by periodic retraining of ml models, increase experimentation rate with multi armed bandits, tune multiple parameters experimentally with bayesian optimization. About the reader: For ml and software engineers looking to extract the most value from their systems. Examples in python and numpy. About the author: David Sweet has worked as a quantitative trader at Getco and a machine learning engineer at Instagram. He teaches in the AI and Data Science master's programs at Yeshiva University. Table of contents: 1. Optimizing systems by experiment, 2. A/b testing, 3. Multi armed bandits, 4. Maximizing business metrics while experimenting, 5. Response surface methodology, 6. Optimizing continuous parameters, 7. Contextual bandits, 8. Making targeted decisions, 9. Bayesian optimization.

automating experimental optimization 7 managing business metrics 8 practical considerations

the internet is quickly becoming a commonly used tool for business customer interaction social media platforms that were once typically reserved for personal use are now becoming a vital part of a business s strategy maximizing commerce and marketing strategies through micro blogging examines the various methods and benefits of using micro blogs within a business context bringing together the best tools and tactics necessary to properly incorporate this approach highlighting current empirical research and insights from various disciplines this book is an essential reference source for academics graduate students social media strategists and business professionals interested in the positive use of social media in business environments
