more than two million child abuse reports are filed annually on behalf of children in the united states each of the reported children becomes a concern at least temporarily of the professional who files the report and each family is assessed by additional professionals a substantial number of children in these families will subsequently enter foster care until now the relationships between the performance of our child welfare system and the growth and outcomes of foster care have not been understood in an effort to clarify them barth and his colleagues have synthesized the results of their longitudinal study in california of the paths taken

by children after the initial abuse report foster care a return to their homes or placement for adoption

child abuse does not always leave visible marks sometimes the abuse is emotional or sexual often a child is abused in more than one way although abuse is never the victim s fault they may feel too guilty or ashamed to tell anyone about it therefore it is important for others to recognize the signs through informative text full color photographs discussion questions and detailed infographics this volume teaches young adults what abuse looks like and how to get help for themselves or for others if they recognize signs of an abusive situation

the problem of child abuse has become increasingly evident in north america and western europe many countries are now struggling with issues involving the definition of child maltreatment reporting requirements processes for responding to reports substantiation rates and services to abused children and their families this book illustrates alternative approaches to dealing with these problems by examining and comparing the designs of child abuse systems in nine countries the us english canada netherlands denmark finland germany belgium and sweden

research in child abuse has expanded dramatically since the first controlled studies were started in the mid 1970s the fields of developmental psychology and clinical child psychology have progressed in tandem resulting in theoretical richness and increased methodological sophistication with these advances it is now commonly recognized that child abuse and neglect can be fully understood only through the use of longitudinal research methods difficult expensive and time consuming though their application may be the effects of child abuse and neglect reviews the findings from current longitudinal research and also serves as an authoritative guide to the complex methodologic issues involved in conducting such studies the book s introductory chapter examines the intergenerational transmission of abusive behavior and its adult sequelae in depth analyses of three innovative longitudinal investigations follow the first focuses on the value of an at risk approach to research in this area the second evaluates structural equations modeling a relatively new statistical method and the third demonstrates the usefulness of a transactional approach to the longitudinal study of different forms of maltreatment other contributions focus specifically on the interpretation of existing research and on conducting future studies provocative discussions on crucial definitional issues are complemented by equally trenchant analyses of as yet unresolved design considerations the remaining chapters deal with basic measurement issues

especially the assessment of parental personality and psychopathology psychological abuse parental childrearing belief systems parent child attachment and other domains of parent child interaction and the impact of maltreatment on physical and emotional development an effective synthesis of practical and research issues the effects of child abuse and neglect is essential reading for all child development psychiatry child psychiatry family sociology social work pediatric nursing and other human services professionals responsible for recognizing treating and preventing child abuse as well as for ameliorating its long term consequences

this illustrated guide to the role of the forensic anthropologist in investigating child abuse is an essential resource in one of the most contentious areas of forensic pathology not only does it supply a review of the literature in this field but it illustrates the material with photographs from real cases investigated by the harris county institute of forensic sciences which serves a population of four million people broken down into body regions and skeletal elements for ease of reference the atlas facilitates the vital work performed by forensic anthropologists who bring to the autopsy table a store of specialist knowledge that can turn a case despite the frequency of child fatalities in america 2.3 per 100 000 attributed to physical abuse merely recognizing the offense is a major forensic challenge the tell tale signatures of non accidental injury can be very subtle making it difficult to differentiate between accidental and non accidental injury yet successful adjudication of a child abuse case often rests on the correct interpretation of skeletal injury in this volume the authors guide the reader through published data regarding the mechanics and interpretation of injuries including the agencies they indicate the material includes discussion of the limitations faced in interpreting some injuries where making a judgment on cause is tricky in addition a chapter on natural diseases affecting the bones provides a good overview of several conditions that are often invoked as mimics of child abuse finally this publication evinces the value of collaboration between the pathologist and the anthropologist

this book is an accessible knowledge base for the whole area of child abuse and child protection now fully updated in terms of policy cases and research

the causes of child abuse and neglect have been major topics of study since the 1960s but treatment strategies research and legal issues have only received concentrated attention since the 80s the leading figures in these efforts have contributed to this handbook a state of the art compilation of their findings that also includes writings on associated cultural issues youth violence

sexual abuse and child development both a text and a reference the volume is uniquely founded on empirical research

highlighting the importance of a safe place as the foundation of the healing process for those affected by child sexual abuse this practical book details the factors that contribute to a secure therapeutic climate where recovery can take place

child abuse and neglect is as at a minimum any recent act or failure to act on the part of a parent or caretaker which results in death serious physical or emotional harm sexual abuse or exploitation or an act or failure to act which presents an imminent risk of serious harm four major types of maltreatment are usually included neglect physical abuse sexual abuse and emotional abuse although any of the forms of child maltreatment may be found separately they often occur in combination this book presents issues and research in this field

sets the subject in its historical social and political context examining the strengths and weaknesses of a variety of debates and contributions and thus providing practitioners and students with a comprehensive guide to theoretical and practical issues annotation copyright by book news inc portland or

child abuse and neglect is recognized as one of the major social problems facing modern society today an increase in the theory and research into causes and treatment has resulted in the growth of practical knowledge derived from the fields of psychiatry psychology education sociology social work and related professions reflecting a multi disciplinary approach this study presents the latest findings from these fields by exploring the issue of child abuse and neglect from a broad theoretical perspective both micro and macro approaches are stressed in the work with particular emphasis on social factors related to child abuse and neglect characteristics of adults and families likely to abuse and neglect and emerging strategies of treatment including family therapy

presents facts tables charts and statistics on several aspects of child abuse in the u s

social work students are often required to take courses in the domain of quantitative literacy but struggle with the relative inattention to policy and social issues of special significance to professional social workers these courses as well as the books written for them may also present mathematical demands many social workers are unprepared to meet however issues such as

poverty measurement adjustment of the purchasing power of social welfare benefits demographic strains on the social security program and probability theory as a means of estimating the likelihood of child abuse or neglect represent only a few of the many quantitative problems related to the concerns of professional social workers written in an accessible style social workers count provides social workers and those in neighboring disciplines with the background necessary to engage the quantitative aspects of policy and social issues relevant to social work

first published in 2009 routledge is an imprint of taylor francis an informa company

this book is about men and women who neglect and abuse children physically emotionally and sexually a number of key themes emerge emotional abuse causes the most long term harm to children although combinations of emotional with physical and or sexual abuse cause the most harm to long term mental health because of the long term burden which abuse imposes on its victims it is crucial to intervene effectively with abusers potential and actual to prevent them from either beginning abuse committing further abuse or entering the victim to abuser cycle abusers have often experienced physical emotional or sexual abuse or neglect in their own childhoods the role of disordered attachments to adult figures in the victim to abuser cycle is considered in detail including ways of effective intervention men and women who kill children can be characterized in various ways and various programmes of intervention can be designed the cycle of poverty is also considered in detail a process by which economically poor families beget children who enter a cycle of both economic and psychological poverty in which risks of all kinds of child abuse and neglect are elevated in the section on iatrogenic abuse i consider ways in which institutions such as medicine child care social work and the media can actually harm children through their interventions special issues considered in detail are munchausen syndrome by proxy shaken baby syndrome sids deaths the epidemiology of child sexual abuse dissociative syndromes as sequels and antecedents of child abuse child abuse moral panics child pornography and the internet and the problem of suicide in men facing charges of child sexual abuse as well as suicide by a parent following their murder of a child

a report on child abuse offering guidelines for treatment of both the child and the family in an attempt to keep the abuse from recurring
