for decades the reigning scholarly wisdom about nuclear weapons policy has been that the united states only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack so long as the us or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold according to this theory possessing more weapons than necessary for a second strike capability is illogical this argument is reasonable but when compared to the empirical record it raises an important puzzle empirically we see that the united states has always maintained a nuclear posture that is much more robust than a mere second strike capability in the logic of american nuclear strategy matthew kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state s national security goals in fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence this book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages in so doing it helps resolve one of the most intractable puzzles in international security studies buoyed by an innovative thesis and a vast array of historical and quantitative evidence the logic of american nuclear strategy will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence

compellence is a fundamental tool of international security policy this study explains how culture shapes the ways that decision makers respond to the threat of force first morgan builds a theoretical framework next he analyzes three cases in which states attempted to compel japan to change its behavior the first is an in depth analysis of the 1895 triple intervention in which russia germany and france forced japanese leaders to return the liaotung peninsula to china following the first sino japanese war the second and third relate to world war ii the 1941 oil embargo intended to coerce tokyo to withdraw its military from china and washington s 1945 efforts to force japan to end the war these cases explain much of the seemingly irrational behavior previously attributed to japanese leaders morgan demonstrates that culture clearly influenced outcomes in all three cases by conditioning japanese perceptions strategic preferences and governmental processes these findings are relevant today and recent conflicts suggest that they will be increasingly important into the 21st century this book offers policy makers a much needed method for employing strategic culture analysis to develop more effective security strategies strategies that will be of vital importance in an increasingly volatile world
