the purpose of our research is to enhance the efficiency of ai problem solvers by automating representation changes we have developed a system that improves the description of input problems and selects an appropriate search algorithm for each given problem motivation researchers have accumulated much evidence on the importance of appropriate representations for the efficiency of ai systems the same problem may be easy or difficult depending on the way we describe it and on the search algorithm we use previous work on the automatic improvement of problem descriptions has mostly been limited to the design of individual learning algorithms the user has traditionally been responsible for the choice of algorithms appropriate for a given problem we present a system that integrates multiple description changing and problem solving algorithms the purpose of the reported work is to formalize the concept of representation and to confirm the following hypothesis an effective representation changing system can be built from three parts a library of problem solving algorithms a library of algorithms that improve problem descriptions a control module that selects algorithms for each given problem
