one of the legendary figures in twentieth century landscape design ian mcharg transformed the fields of landscape architecture and planning through his personal methodology his unique curriculum at the university of pennsylvania and his own inspired writing in classic texts such as his landmark 1969 book *Design With Nature* mcharg painted an incredibly rich and exuberant picture of the organic world while conjuring up a vision of a more wholesome and productive metropolis in this new entry in the popular *Conversations with Students* series we are proud to make mcharg's never before in print lecture collaboration with nature available for the first time captured on tape in the 1970s the lecture is the sequel to *Design With Nature* this is a must read for anyone in the fields of landscape architecture environmental science and urban planning

a concise illuminating collection of essential essays from one of the pioneers of the field of landscape architecture

ian l mcharg's landmark book *Design With Nature* changed the face of landscape architecture and planning by promoting the idea that the design of human settlements should be based on ecological principles mcharg was one of the earliest and most influential proponents of the notion that an understanding of the processes that form landscapes should underlie design decisions in *To Heal the Earth* mcharg has joined with frederick steiner a noted scholar of landscape architecture and planning to bring forth a valuable cache of his writings produced between the 1950s and the 1990s mcharg and steiner have each provided original material that links the writings together and places them within the historical context of planning design work and within the larger field of ecological planning as practiced today the book moves from the theoretical beginning with the 1962 essay *Man and Environment* which sets forth the themes of religion science and creativity that emerge and reappear throughout mcharg's work to the practical including discussions of methods and techniques for ecological planning as well as case studies other sections address the link between ecology and design and the issue of ecological planning at a regional scale covering topics such as education and training necessary to develop the field of ecological planning how to organize and arrange biophysical information to reveal landscape patterns the importance of incorporating social factors into ecological planning and more *To Heal the Earth* provides a larger framework and a new perspective on mcharg's work that brings to light the growth and development of his key ideas over a forty year period it is an important contribution to the literature and will be essential reading for students and scholars of ecological planning as well as for professional planners and landscape architects

new poetic work from the grandfather of ecological planning and author of the classic book *Design With Nature* twenty five poems in all ian mcharg founded the department of landscape architecture at the university of pennsylvania in 1954 and has become identified as founder of ecological planning and design he has written numerous articles and professional reports but is best known for the classic *Design With Nature* a finalist for the national book award in 1969 he was awarded the national medal of art from president bush in 1992 he lives with his wife and two sons in pennsylvania

the routledge companion to biology in art and architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture the book presents a diversity of hybrid art and science thinking revealing how science and culture are interwoven the book situates bioart and bioarchitecture within an expanded field of biology in art architecture and design it proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists architects designers scientists historians and theoreticians includes over 150 black and white images

the living landscape is a manifesto resource and textbook for architects landscape architects environmental planners students and others involved in creating human communities since its first edition published in 1990 it has taught its readers how to develop new built environments while conserving natural resources no other book presents such a comprehensive approach to planning that is rooted in ecology and design and no other book offers a similar step by step method for planning with an emphasis on sustainable development this second edition of the living landscape offers frederick steiner's design

oriented ecological methods to a new generation of students and professionals the living landscape offers a systematic highly practical approach to landscape planning that maximizes ecological objectives community service and citizen participation more than 20 challenging case studies that demonstrate how problems were met and overcome from rural america to large cities scores of checklists and step by step guides hands on help with practical zoning land use and regulatory issues coverage of major advances in gis technology and global sustainability standards more than 150 illustrations as steiner emphasizes throughout this book all of us have a responsibility to the earth and to our fellow residents on this planet to plan with vision we are merely visiting this planet he notes we should leave good impressions

humans have always been influenced by natural landscapes and always will be even as we create ever larger cities and our developments fundamentally change the nature of the earth around us in human ecology noted city planner and landscape architect frederick steiner encourages us to consider how human cultures have been shaped by natural forces and how we might use this understanding to contribute to a future where both nature and people thrive human ecology is the study of the interrelationships between humans and their environment drawing on diverse fields from biology and geography to sociology engineering and architecture steiner admirably synthesizes these perspectives through the lens of landscape architecture a discipline that requires its practitioners to consciously connect humans and their environments after laying out eight principles for understanding human ecology the book s chapters build from the smallest scale of connection our homes and expand to community scales regions nations and ultimately examine global relationships between people and nature in this age of climate change a new approach to planning and design is required to envision a livable future human ecology provides architects landscape architects urban designers and planners and students in those fields with timeless principles for new creative thinking about how their work can shape a vibrant resilient future for ourselves and our planet

in the twenty first century housing has become a site of ecological experimentation and environmental remediation from the vantage point of contemporary architecture conservation concerns and emergent building science technologies support one another with new processes and materials deployed to reduce energy usage water consumption and carbon dioxide emissions landscapes of housing examines this trend in historical perspective arguing for a more considered environmental vision that includes the organic social and cultural dimensions of landscape by shifting the focus from architecture the book highlights and critiques the relationship between dwelling and landscape itself contributors from a wide range of international perspectives propose a more integrative ecology that includes history culture society and materiality in addition to technology within contemporary ecological housing programs this book will be a resource for upper level students academics and researchers in landscape architecture interested in the social and political implications of ecological housing

this is a new paperback version of a text originally published in 1969 that outlined the principles of urban design from an environmental perspective it should benefit architects urban and regional planners and environmentalists
