magnetic ferroelectric and multiferroic metal oxides covers the fundamental and
theoretical aspects of ferroics and magnetoelectrics their properties and important
technological applications serving as the most comprehensive up to date reference
on the subject organized in four parts dr biljana stojanovic leads expert contributors
in providing the context to understand the material part i introduction the
theoretical and practical aspects of ferroelectrics part ii ferroelectrics from theory
structure and preparation to application magnetic metal oxides part iii magnetic
oxides ferromagnetics antiferromagnetics and ferrimagnetics multiferroics part iv
multiferroic metal oxides and future directions in research and application part v
future of metal oxide ferroics and multiferroics as ferroelectric materials are used
to make capacitors with high dielectric constant transducers and actuators and in
sensors reed heads and memories based on giant magnetoresistive effects this
book will provide an ideal source for the most updated information addresses
ferroelectrics ferromagnetics and multiferroelectrics providing a one stop

reference for researchers provides fundamental theory and relevant important technological applications highlights their use in capacitors with high dielectric constant transducers and actuators and in sensors reed heads and memories based on giant magnetoresistive effects

nanostructures in ferroelectric films for energy applications grains domains interfaces and engineering methods presents methods of engineering nanostructures in ferroelectric films to improve their performance in energy harvesting and conversion and storage ferroelectric films which have broad applications including the emerging energy technology usually consist of nanoscale inhomogeneities for polycrystalline films the size and distribution of nano grains determines the macroscopic properties especially the field induced polarization response for epitaxial films the energy of internal long range electric and elastic fields during their growth are minimized by formation of self assembled nano domains this book is an accessible reference for both instructors in academia and r d professionals

in countries such as syria iraq south sudan and yemen internationally recognized governments embroiled in protracted armed conflicts and with very little control over their territory have requested direct military assistance from other states these requests are often accepted by the other states despite the circumvention of the united nations security council and extensive violation of international humanitarian law and human rights in this book erika de wet examines the authority entitled to extend a request for or consent to direct military assistance as well as the type of situations during which such assistance may be requested notably whether it may be requested during a civil war ultimately de wet addresses the question of if and to what extent the proliferation of military assistance on the request of a recognized government is changing the rules in international law applying to the use of force
