this volume is about why work changed to become more precarious around the turn of the century this happened not just in the

developed world but also inside sectors that were demarcated as organized and modern within developing countries like india in these sectors unlike the greater part of the indian economy insecure jobs were uncommon before winds of change made them normal this shift had occurred before the great global financial crisis of 2008 between 2005 8 a survey based on over thousand structured interviews with workers in offices factories shops and establishments below the supervisory rank in mumbai was undertaken this is the innovative segment of the book which tries to measure and quantify some of these changes and their associations it is designed to investigate the central proposition of the insecurity hypothesis ih which is that the economic risk of increased and global competition was being progressively passed on from the employer to the employee this was happening through shortened job tenure erratic remuneration variable work contingent employment and institutional changes that remove or reduce protection bargaining power of employees in the work place everywhere the corollary is that widespread and unremitting work and income related insecurity is an expedient competitive strategy but a damaging socio economic phenomenon please note taylor francis does not sell or distribute the hardback in india pakistan nepal bhutan bangladesh and sri lanka

which new institutions do we need in order to trigger local and global sustainable urban development are cities the right starting points for implementing sustainability policies if so what are the implications for city management this book reflects the situation of cities in the context of global change and increasing demands for sustainable development the book introduces core findings new methods and international experience related to sustainability innovations and the social transformation of cities synthesizing insights from megacity research sustainability science and urban planning written by a team of more than fifty leading researchers and practitioners from all five continents it traces general urban transformations and introduces new approaches such as smart growth strategies cross sectoral transdisciplinary urban transition management rubanisation and city

syntegration the book reveals the potential of new networked agencies of sustainability transformation and discusses the role of science institutions in the diffusion and implementation of institutional and social innovations this comprehensive book is of immense value to students researchers and professionals working on issues of sustainable development in environmental programs in human geography planning and the built environment sociology and policy studies institutional economics and environmental politics

the first edition of million cities of india was published in 1978 it was based on 1971 census returns at that time there were only 9 million cities calcutta bombay delhi madras hyderabad ahmadabad bangalore kanpur and poona the second edition of the book was published in two volumes in 1998 using 1991 census data by that time the number of cities with a million or more population had increased to 23 by 2001 it went up to 35 and by 2011 to 53 and is likely to go up to 70 by 2021 the first edition of the book was

published by prasaranga university of mysore in 1978 prof r p misra the editor of the book at that time was the director of institute of development studies university of mysore mysuru karnataka and the second edition of the book was published in 1998 in two volumes by sustainable development foundation new delhi this is the third edition of the book and is based on 2011 census returns it covers 53 million cities as reported by census of india and 8 de facto million cities which formed urban agglomerations uas ua was an extended city comprising the built up area around a major city provided that the extended areas were located within the same state for example noida greater noida ghaziabad gurugram and faridabad are functionally parts of delhi but they are outside the union territory of delhi and hence not included in delhi ua if they are considered as part of delhi ua the 2011 population of delhi would go up to 21.7 million thus the population of all the cities of kerala got inflated and they cannot be compared with other cities of the country in this respect

addressing the complex interrelationships between city making and the resources needed for its production predatory urbanism explores the link between urbanization and resources in the global south it particularly focuses on urban megaprojects highlighting these planned developments and re developments carried out by the state or state linked agencies

a distinctive feature of urbanization in the last 50 years is the expansion of urban populations and built development well beyond what was earlier conceived as the city limit resulting in metropolitan areas this is challenging the relevance of traditional municipal boundaries and by extension traditional governing structures and institutions steering the metropolis metropolitan governance for sustainable urban development encompasses the reflections of thought and practice leaders on the underlying premises for governing metropolitan space sectoral adaptations of those premises and dynamic applications in a wide variety of contexts those reflections are structured into three sections section 1 discusses the conceptual underpinnings of metropolitan governance analyzing why political technical and administrative arrangements at this level of government are needed section 2 deepens the

discussion by addressing specific sectoral themes of mobility land use planning environmental management and economic production as well as crosscutting topics of metropolitan governance finance and monitoring and evaluation section 3 tests the concepts and their sectoral adaptations against the practice with cases from africa america asia and europe

this book would be extremely valuable as guideline to planners geographers economists academicians researchers and others who are keen to appraise themselves of the tremendous development in the india transport sector

in this edition we have featured the developments about the delhi metro which celebrated its 27th anniversary recently we have discussed how the world s first metro rail system was built in london based on feedback received from the readers we have also started a knowledge series to keep readers updated on metro rail technology we have covered the interviews of mr achal khare managing director national high speed rail corporation nhsrc mr ashutosh shukla director transportation mobility schneider electric india and mr luong vo ta general director vinh hung jsc vietnam these leaders have made a huge success in their respective fields despite the covid 19 impact on the industry

urban india has been in transition for centuries but perhaps never more so than since the last decade of the twentieth century when the national economy was opened wide to international trade and competition indian cities in transition seeks to understand the nature of change that indian cities are undergoing from a multidisciplinary perspective there are seventeen essays in the volume encompassing the work of urban planners geographers demographers social anthropologists economists and political scientists they examine the processes of demographic environmental economic political and social change and their impact on indian cities based on different aspects of change the articles are categorised under five sub themes globalisation and urban restructuring environmental impacts of liberalisation economic dimensions of the post 1990s reforms political economy of

change in the planning and management of indian cities and liberalisation and its micro level impacts

beyond metropolis builds on studies conducted during the 1990s under the centre for human settlements at the university of british columbia
