a landmark textbook on development economics the study of development in low income countries is attracting more attention around the world than ever before yet until now there has been no comprehensive text that incorporates the recent huge strides made in the subject development economics does precisely that in a clear rigorous and elegant fashion debraj ray one of the most accomplished theorists in development economics today presents in this

book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research he covers such vital subjects as theories of economic growth economic inequality poverty and undernutrition population growth trade policy and the markets for land labor and credit a common point of view underlies the treatment of these subjects that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets diverse topics such as the new growth theory moral hazard in land contracts information based theories of credit markets and the macroeconomic implications of economic inequality come under this common methodological umbrella the book takes the position that there is no single cause for economic progress but that a combination of factors among them the improvement of physical and human capital the reduction of inequality and institutions that enable the background flow of information essential to market performance consistently favor development ray supports his arguments throughout with examples from around the world the book assumes a knowledge of only introductory economics and explains sophisticated concepts in simple direct language keeping the use of mathematics to a minimum development economics will be the definitive textbook in this subject for years to come it will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book and it will be an important resource for policy makers who increasingly find themselves dealing with complex issues of growth inequality poverty and social welfare

with contributions from 35 leading economists this forward looking book explores the future of development economics against the background of the past half century of development thought and practice outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation the volume offers a thorough analysis of the broad range of issues involved in development economics and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty an overriding issue is whether in the future development economics is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory frontiers of development economics is an ideal reference for all those working in the international development community

includes annual list of doctoral dissertations in political economy in progress in american universities and colleges and the hand book of the american economic association

this is an open access title available under the terms of a cc by nc nd 4 0 international licence it is free to read at oxford scholarship online and offered as a free pdf download from oup and selected open access locations the formation of coalitions to achieve both collaborative and competitive goals is a phenomenon we see all around us the list is long and varied production cartels political lobbies customs unions environmental coalitions and ethnic alliances are just a few everyday instances drawing upon and extending his inaugural lipsey lectures at the university of essex debraj ray looks at coalition formation from the perspective of game theory how are agreements determined which coalitions will form and are such agreements invariably efficient from a social perspective ray brings together developments in both cooperative and noncooperative game theory to study the analytics of coalition formation and binding agreements this book concentrates on pure theory but discusses several potential applications such as oligopoly and the provision of public goods

this handbook is currently in development with individual articles publishing online in advance of print publication at this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site please note that the online publication date for this handbook is the date that the first article in the title was published online

over 800 million people suffer from chronic hunger and over ten million children die each year from preventable causes these may seem like overwhelming statistics but as stephen smith shows in this call to arms global poverty is something that we can and should solve within our lifetimes ending global poverty explores the various traps that keep people mired in poverty traps like poor nutrition illiteracy lack of access to health care and others and presents eight keys to escaping these traps smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it for example celebrities in commercials who encourage viewers to adopt a poor child really seem to care but will sending money to these organizations do the most good smith explains how to make an informed decision grass roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies

in some of the poorest countries in the world explaining what they do and what makes them effective

this collection provides a complete introduction to new ways of thinking about economic development emphasizing economic theory each article has been selected for its theoretical completeness accessibility and clarity as well as its value as a contribution to the field a thorough introductory essay summarizes the state of the field for those new to the field and explains the importance of the articles selected

this volume brings together 13 essays written by known academics across three continents on economic growth and development from theoretical and empirical perspectives

doctoral thesis dissertation from the year 2013 in the subject economics economic cycle and growth grade 4 0 atlantic international university business studies and economics course development studies language english abstract development economics entail all the aspects of the development process especially meant for the developing countries to overcome the challenges that impede development this can be through education education and man power development restructuring market incentives incorporating favorable social and political approaches and practices among other factors human beings however need streamlined social and economic systems that are able to achieve development through major changes in social structures national institutions cultures and attitudes as well as eradication of poverty reduction of income inequality and acceleration of economic growth the developing world needs a multi disciplinary approach and ideas so as to come out of the economic backward situation micheel p 2003 9 describes that because of heterogeneity of the developing world and the complexity of the development process development economics must be eclectic attempting to combine relevant concepts and theories from traditional economics analysis along with new models and broader multi disciplinary approaches from historical and co temporally development experience of africa asia and latin america debraj ray 2007 puts it that development economics studies economics of the developing world and has made excellent use of economic theory econometrics anthropology sociology political science biology and demography it needs a lot more dimensional approach to understand it other scholars have tried to bring about the key issues that are in development economics such as dasgupa 1998 hoff braverman and stiglitz 1993 ray 1998 bardhan and udry 1999 mookerjee and ray 2001 and sen 1999

this text maintains a problem and policy oriented approach to development economics it focuses on people and government in developing countries

this is the first of a series of books devoted to economic analysis relating to problems of the indian economy the introduction surveys the landmark contributions in the field and the essays focus on some of the issues relating to the fundamental theorems and their implications for public policy

this publication contains selected papers from the 15th annual conference on international development issues held in bangalore in may 2003 the first such conference to be held in a developing country the theme of the conference was accelerating development focusing on four key themes fostering entrepreneurship innovation and growth challenges of development in lagging regions participation and inclusion and scaling up and evaluation as well as an examination of development issues relevant to india such as infrastructure development
