as the global population ages the prevalence of neurodegenerative diseases is rising posing significant challenges to healthcare systems artificial intelligence ai and radiomics are emerging as powerful tools in this domain offering innovative methods for diagnosing monitoring and treating these conditions radiomics enables the extraction of

quantitative features from medical images while ai excels at analyzing large datasets and identifying patterns that might be imperceptible to the human eye the integration of these technologies particularly in neuroimaging holds the potential to revolutionize our understanding and management of neurodegenerative diseases the goal of this research is to address the complex challenges posed by neurodegenerative diseases through the application of ai and radiomics specifically we aim to 1 identify and validate novel imaging biomarkers for the early detection and monitoring of neurodegenerative disorders 2 develop ai driven predictive models to assess disease progression and treatment outcomes enabling personalized healthcare approaches 3 utilize machine learning and database mining techniques to analyze extensive health datasets uncovering new insights and correlations specific to neurodegenerative diseases 4 evaluate the clinical utility of these technologies in enhancing diagnostic accuracy improving patient outcomes and optimizing healthcare resources

citizen support for democratic and autocratic regimes takes a political culture perspective on the struggle between democracy and autocracy by examining how these regimes fare in the eyes of their citizens taking a globally comparative approach it studies both the levels as well as the individual and system level sources of political support in democracies and autocracies worldwide the book develops an explanatory model of regime support which includes both individual and system level determinants and specifies not only the general causal mechanisms and pathways through which these determinants affect regime support but also spells out how these effects might vary between the two types of regimes it empirically tests its propositions using multi level structural equation modeling and a comprehensive dataset that combines recent public opinion data from six cross national survey projects with aggregate data from various sources for more than 100 democracies and autocracies it finds that both the levels and individual level sources of regime support are the same in democracies and autocracies but that the way in which system level context factors affect regime support differs between the two types of regimes the results enhance our understanding of what determines citizen support for fundamentally different regimes help assessing the present and future stability of democracies and autocracies and provide clear policy implications to those interested in strengthening support for democracy and or fostering democratic change in autocracies comparative politics is a series for researchers teachers and students of political science that deals with contemporary government and politics global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour the series is published in association with the european consortium for political research for more information visit ecpr.net/eu the series is edited by susan scarrow chair of the department of political science university of houston and jonathan slapin professor department of political science university of zurich
