during the 18 year program of atmospheric testing of nuclear weapons 1945 1962 some of the 225 000 participants were exposed to radiation many of these participants have been experiencing sicknesses that may be test related currently test participants who had served in military units have pending over 6 000 claims for compensation at the department of veterans affairs this study presents improved methods for calculating the radiation doses to which these individuals were exposed and are intended to be useful in the adjudication of their claims

featuring the improved format used in the 5th edition this updated set presents in logical groupings comprehensive toxicological data for industrial compounds including cas numbers physical and chemical properties exposure limits and biological tolerance values for occupational exposures making it essential for toxicologists and industrial hygienists this edition has about 40 new authors who have brought a new and international perspective to interpreting industrial toxicology and discusses new subjects such as nanotechnology flavorings and the food industry reactive chemical control to comprehensive chemical policy metalworking fluids and pharmaceuticals

contents chapter 1 the journey begins chapter 2 food work chapter 3 bimo training chapter 4 bimo inspections chapter 5 international bimo inspections chapter 6 official action indicated oai work chapter 7 electronic records review chapter 8 regional district management issues preface a few years ago i put together a collection of my thoughts regarding the us fda and my personal experiences over 13 years as a field investigator in texas since then i have had the opportunity to experience a world of new opportunities as a consultant so i thought it was time to revisit the bubblegum badge world along with a few colleagues i have added several new sections and have tightened up some of the language and phrasing

it is as with everything in life still a work in progress as i said in the first edition of this book i dont intend this book to be either a roasting or a toasting i hope what it will do is provide a glimpse of what the fda does well and what it needs to improve on as evidenced by audit reports from the health and human services hhs office of inspector general oig the name bubble gum badge by no means suggests a weak or ineffective organization rather it is something my friend from the imports division stated during a happy hour we were at in 1999 he put it this way if you think that gold fda badge is going to get you out of trouble son you are wrong its a bubble gum badge and is more trouble than you have ever known thankfully i did not get into any real trouble as a young man with a great responsibility to protect and serve there are many ways to keep harmful products from the us market and some of which take longer than the proverbial slow boat to china i was a frontline grunt out in the field conducting the fda business of the day those twelve years and eight months were some of the most challenging and rewarding moments any one person could ask for when you sit down to eat today or see your family member take their medications or go into surgery you can rest assured that at least one of the fdas finest had at some point in the products life cycle taken a look to see if it passed inspection fda does the work that is most taken for granted and expected as a given by the us public your tax dollars were always hard at work when i was on the job even though it may not have always appeared that way i would like to thank the fda for taking me around the world and giving me the best training anyone can ask for in this quality assurance qa business on the job training fda needs your help and more regulatory authority for biologics drugs and devices only congress can grant more fda authority and budget battles seem to be the mainstay most of the information i reference comes from the public domain site fda gov the fdas mission is too important not to be modernized supported and innovated fda falling behind in modernization would mean lives at risk globally the oversight of our global health market is waiting if you want it and qualify your official gold fda badge is waiting for you fda has mine in a vault next to my government international passport i have my old decommissioned one anyone reading this book can be an fda consumer safety officer cso investigator trust me when i say sixty semester hours of accredited college science and some luck on the computer lottery usajobs opm gov and youre in i would suggest higher than a bachelor of science education for entry into bioresearch

monitoring as an ex fda recruiter and mentor to many new hire fda field investigators i would say a graduate degree or higher also assures your entry to drug and device program field work so take a look behind the kitchen pharmacy and hospital operation room doors with me thank you global health providers and professionals all of you thank you health care receivers all of you without you there would be no need for health care products i think that includes everyone in the world thank you for your time and for coming along to take a microscopic view into one of the most unsung agencies fda has very little glitz or glamour and i hope you find something you find interesting in this book

this book presents original research findings of the million person study of low dose radiation health effects mps the largest and most comprehensive epidemiologic study of its kind to investigate the health effects of low level chronic radiation exposure on american workers and veterans throughout the 20th century since the early 1900s epidemiologists have studied the consequences of radiation exposures yet the health effects of low levels received gradually over time remain unresolved this uncertainty comes at a time when the public and workers are experiencing ever increasing levels of

radiation exposure from advances in medical radiation imaging techniques e g ct scans frequent flying at high altitudes and environmental and occupational exposures the mps is providing answers by studying 30 radiation exposed u s populations including workers at nuclear power plants radiologists workers at former manhattan project sites nuclear submariners nuclear weapons test participants atomic veterans industrial radiographers and radium dial painters ongoing for more than 20 years and coordinated by the national council on radiation protection and measurements vanderbilt university medical center and memorial sloan kettering cancer center the mps is a national effort supported by the department of energy national aeronautics and space administration u s navy defense threat reduction agency nuclear regulatory commission centers for disease control and prevention and the environmental protection agency unparalleled in scope and quality the mps provides an understanding of low dose health effects that is desperately needed for decision makers and the radiation protection community as society continues to increase the uses of radiation technologies individual chapters were originally published in the international journal of radiation biology

from 1945 through 1962 the us atmospheric nuclear weapons testing program involved hundreds of thousands of military and civilian personnel and some of them were exposed to ionizing radiation veterans groups have since been concerned that their members health was affected by radiation exposure associated with participation in nuclear tests and have pressured congress for disability compensation several pieces of legislation have been passed to compensate both military and civilian personnel for such health effects veterans concerns about the accuracy of reconstructed doses prompted congress to have the general accounting office gao review the dose reconstruction program used to estimate exposure the gao study concluded that dose reconstruction is a valid method of estimating radiation dose and could be used as the basis of compensation it also recommended an independent review of the dose reconstruction program the result of that recommendation was a congressional mandate that the defense threat reduction agency dtra a part of the department of defense ask the national research council to conduct an independent review of the dose reconstruction program in response to that request the national research council established the committee to review the dose reconstruction

program of the defense threat reduction agency in the board on radiation effects research brer the committee randomly selected sample records of doses that had been reconstructed by dtra and carefully evaluated them the committee s report describes its findings and provides responses to many of the questions that have been raised by the veterans
