there are already many excellent books on existentialism some of them deal with particular problem or particular existentialist writers most of those that deal with existentialism as a whole divide their subject matter according to authors presenting chapters on kierkegaard heidegger sartre and the rest thus i think that there is room for the present book which attempts a comprehensive examination and evaluation of existentialism but does so by thematic treatment that is to say each chapter deals with a major theme of existentialist philosophy and these themes are arranged in the order of the existential dialect of course each chapter is illustrated with material from the writings of existentialists from kierkegaard to camus

existentialism as a philosophy gained prominence after world war ii instead of focusing upon a particular aspect of human existence existentialists argued that our focus must be upon the whole being

as he she exists in the world rebelling against the rationalism of such philosophers as descartes and hegel existentialists reject the emphasis placed on man as primarily a thinking being freedom is central to human existence and human relations and encounters cannot be reduced simply to thinking this dictionary provides through alphabetically arranged entries overviews of the various tenets philosophers and writers of existentialism and of those writers philosophers who in retrospect seem to existentialists to espouse their philosophy nietzsche kierkegaard dostoyevski et al
