david j kalupahana s buddhist philosophy a historical analysis has since its original publication in 1976 offered an unequaled introduction to the philosophical principles and historical development of buddhism now representing the culmination of dr kalupahana s thirty years of scholarly research and reflection a history of buddhist philosophy builds upon and surpasses that earlier work providing a completely reconstructed detailed analysis of both early and later buddhism

originally published in 1962 this book discusses and interprets the main themes of buddhist thought in india and is divided into three parts archaic buddhism tacit assumptions the problem of original buddhism the three marks and the perverted views the five cardinal virtues the cultivation of the social emotions dharma and dharmas skandhas sense fields and elements the sthaviras the eighteen schools doctrinal disputes the unconditioned and the process of salvation some abhidharma problems the mahayana doctrines common to all mahayanists the madhyamikas the yogacarins buddhist logic the tantras

this translation first published in 1956 opens up a classic introduction to buddhist thought to a broader english language readership the book covers the period of early canonical literature with examples of its philosophically relevant ideas followed by the principal philosophical concepts of systematic sravakayana buddhism in the main part of the book frauwallner presents the first survey of the

development of the philosophical systems of mahayana buddhism he was well aware of the limitations in presenting only the buddhist philosophy of the àœclassicalâ i e the systematic period and does not seem to have been ready to add the philosophically creative new post systematic tradition of buddhist epistemology and logic a major subject of his research in subsequent years frauwallnerâ s way of translating was straight forward to remain as close as possible to the original text for technical terms in the source materials he maintained a single translation even when various meanings were suggested for clarity regarding such variations of meaning he relied on the context and his explanation the same approach was taken by the translator of the present book however he has inserted helpful additional headlines into the text and considerably enlarged the index all other additions by the translator are given within square brackets

this introduction to buddhism examines its basic philosophical teachings and historical development setting forth complex and significant ideas in a straightforward and simple style that is easily accessible to the student the author's orientation is philosophical rather than religious or sociological this approach is both the uniqueness and the strength of the work part i outlines the historical background out of which buddhism arose and emphasizes the teachings of early buddhism part ii examines developments in the history of buddhist thought and the emergence of the various schools of buddhism

buddhism had already spread far into other countries before it declined in india in the eleventh century a d hinayana flourished in ceylon burma siam and cambodia mystic buddhism developed in tibet mahayana grew in china in japan the whole of buddhism became the living and active faith of the masses the present study relates to japanese buddhism as in japan alone the whole of buddhism is preserved the author presents buddhist philosophy in an ideological sequence and not in its historical sequence as prof stcherbatsky has done in his buddhist logic but the ideological sequence as presented by the author is not the sequence in the development of ideas it is rather the systematization of the different schools of thought for the purpose of an easier approach divided into fifteen chapters the book deals with different schools of buddhist philosophy the author has grouped these schools under two heads 1 the schools of negative rationalism i e the religion of dialectic investigation and 2 the schools of introspective intuitionism i e the religion of meditative experience the author treats these schools in the most scientific and elaborate way

presenting a comprehensive portrayal of the reading of chinese and buddhist philosophy in early twentieth century german thought chinese and buddhist philosophy in early twentieth century german thought examines the implications of these readings for contemporary issues in comparative and intercultural philosophy through a series of case studies from the late 19th century and early 20th century eric nelson focuses on the reception and uses of confucianism daoism and buddhism in german philosophy covering figures as diverse as buber heidegger and misch he argues that the growing intertextuality between traditions cannot be appropriately interpreted through notions of exclusive identities closed horizons or unitary traditions providing an account of the context motivations and hermeneutical strategies of early twentieth century european thinkers interpretation of asian philosophy nelson also throws new light on the question of the relation between heidegger and asian philosophy reflecting the growing interest in the possibility of intercultural and global philosophy chinese and buddhist philosophy in early twentieth century german thought opens up the possibility of a more inclusive intercultural conception of philosophy

buddhist philosophy of consciousness brings buddhist voices to the study of consciousness this book explores a variety of different buddhist approaches to consciousness that developed out of the buddhist theory of non self topics taken up in these investigations include how we are able to cognize our own cognitions whether all conscious states involve conceptualization whether distinct forms of cognition can operate simultaneously in a single mental stream whether non existent entities can serve as intentional objects and does consciousness have an intrinsic nature or can it only be characterized functionally these questions have all featured in recent debates in consciousness studies the answers that buddhist philosophers developed to such questions are worth examining just because they may represent novel approaches to questions about consciousness

this volume brings together nineteen of mark siderits s most important essays on buddhist philosophy together they cover a wide range of topics from metaphysics logic philosophy of language epistemology and ethics to the specific discussions of the interaction between buddhist and classical indian philosophy each of the essays is followed by a postscript that siderits has written specifically for this volume the postscripts connect essays of the volume with each other show thematic interrelations and locate them relative to

the development of siderits's thought in addition they provide the opportunity to bring the discussion of the essays up to date by acquainting the reader with the development of research in the field since the publication of the essays siderits's work is based on an investigation of Indian sources in their original language nevertheless the focus of the essays is primarily systematic not historical or philological the idea of fusion philosophy a term coined by siderits embodies precisely the assumption that by bringing a western and an eastern tradition together both can benefit by learning from each other about new ways of tackling old philosophical problems

tracing the development of Buddhist thought from a primarily philosophical and epistemological point of view this wide ranging study covers a period of more than 2 000 years following Buddhism from its homeland India through its expansion into China and Japan the diverse historical and cultural settings of Buddhism are considered and the significant changes and shifts in Buddhist thought are placed in context with the remarkable degree of continuity that has been maintained included are discussions of early Buddhist schools in India and South East Asia the differences between the two main branches of Buddhism and the development of Zen philosophies in Japan

organised in broadly chronological terms this book presents the philosophical arguments of the great Indian Buddhist philosophers of the fifth century BCE to the eighth century CE each chapter examines their core ethical metaphysical and epistemological views as well as the distinctive area of Buddhist ethics that we call today moral psychology throughout this book follows three key themes that both tie the tradition together and are the focus for most critical dialogue the idea of anatman or no self the appearance reality distinction and the moral aim or ideal Indian Buddhist philosophy is shown to be a remarkably rich tradition that deserves much wider engagement from European philosophy Carpenter shows that while we should recognise the differences and distances between Indian and European philosophy its driving questions and key conceptions we must resist the temptation to find in Indian Buddhist philosophy some other something foreign self contained and quite detached from anything familiar Indian Buddhism is shown to be a way of looking at the world that shares many of the features of European philosophy and considers themes central to philosophy understood in the European tradition

the riddles that world causation pose to the human mind lie at the bottom of all cosmological systems of thought in their origins all philosophical attitudes are conditioned by partiality and perspectivism the philosopher s attempted flight towards the seemingly remote kingdom of truth is often aborted by the binding twines of perspectival language thus his insights lose themselves in conflicting contradictory manifestos greek cosmology as it is formally set forth by the pre socratics is a clear example of this weary pilgrimage of mind s embodied vision from angle to angle from perspective to perspective not less is to be expected from the systems of hinduism and mutatis mutandis also of buddhist thought more confined from the very outset to the study of reality as a study of human existence of its awareness of embodiment of its spatio temporal bondage and of its ultimate ontological status buddhism gave rise to truly astounding theories of life world causation the process of buddhist thought as it refers to the nature of the human experience as in the world existence covers a vast range of doctrines from original theories of pluralism and phenomenism with sectional multifarious and relativistic notions of causality through the unitary conceptions of monistic idealism up to the top of universal integrationism and dialectical totalism

originally published in 1971 long regarded as a classic this volume is one of the most systematic treatments of hwa yen to have appeared in the english language with excellently translated selections of hwa yen readings factual information and discussion it is highly recommended to readers whose interests in buddhism incline toward the metaphysical and phenomenological

originally published in 1955 the madhyamika philosophy is in the author s view the philosophy which created a revolution in buddhism and through that in the whole range of indian philosophy this volume is a study of the madhyamika philosophy in all its important aspects and is divided into three parts historical this traces the origin and development of the madhyamika philosophy the second part concentrates on a full and critical exposition of the madhyamika philosophy the structure of its dialectic its conception of the absolute and its ethics and religion the last part of the book compares the madhyamika with some of the well known dialectical systems of the west kant hegel and bradley and undertakes a short study of the different absolutisms madhyamika vijnanavada and the vedanta
