in the midst of the cognitive revolution there has been a veritable explosion of interest in topics that have been long banished from academic consideration under the intellectual hegemony of behaviorism most notably notions of self ego and identity are reasserting themselves as fundamental problems in a variety of research traditions within psychology and the social sciences theoretical models review articles edited volumes and empirical work devoted to these constructs are proliferating at a dizzying rate this clearly attests to the renascent interest in these topics the vitality of these research paradigms and the promise that these constructs hold for explaining fundamental aspects of human development and behavior although the renewed academic interest in self ego and identity is obviously an exciting and healthy development there is always the tendency for research to take on a parochial character when boundaries are erected among different theoretical perspectives when empirical findings are viewed in isolation when theories are too sharply delimited and segregated from other domains of behavior then what may seem like progressive healthy and content increasing tendencies in a research paradigm may turn out to be on closer inspection merely an inchoate thrashing about fortunately there is an internal dynamic to scientific investigation that tends to combat this degenerating tendency there is something about the rhythm of science that bids us to transcend parochial theoretical interests and seek the most general theory

why not attain enlightenment wouldn t you like to be at peace feel 100 fulfilled and always be happy and blissful as well as discover what reality is truly about this handbook instructs one on the exact how to of attaining enlightenment whereas most other books just explain the phenomenon of experiencing the higher self this book actually teaches the entire process of transcending the ego and realizing one s true nature of the infinite as the self it provides the information in such a way that enlightenment would commonly occur within a matter of months if one were to read it and apply its teachings so why not take a step out of the finite and into the infinite it can t hurt all that you will discover is your self you will learn what reality truly is the crystallization process manifestation creation duality and nonduality the manifest and unmanifest levels of consciousness of the universal mind ego mind and self mind and much more that all form is actually an illusion that the ego has led itself to believe is real what the ego is limitation and how it holds us back from being the self unlimited and that suffering is an option and not a guarantee how to deprogram the ego s structure to reveal aware mind how all beings are one with god source truth how to meditate work with chakras and comprehend the energetic field that only positives exist and that negatives are just a state of mind ego that it is possible to experience peace love and joy for the rest of our lives this is our mission once again to realize that we are a part of something greater and that ultimately we are all that is by simply knowing

this transcending begins and by implementing the truths teachings within this book enlightenment becomes possible to deny truth is to deny oneself from knowing one's true nature as infinite love aren't you ready to experience god now is the time to stop living in a dream and to start experiencing reality
