anthony hoekema brings to the study of biblical prophecy and eschatology a maturity that is rare among contemporary works on the subject free of sensationalism he evinces a reverence for the scriptures and a measured scholarship one of the best studies on

eschatology available christianity today

thinking about the future is essential for almost all organizations and societies states corporations universities cities ngos and individuals believe they cannot miss the future but what exactly is the future it remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown the future is rarely a simple extrapolation from the present in this important book john urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future this includes examining the methods used to model the future from those of the rand corporation to imagined future worlds in philosophy literature art film tv and computer games he shows that futures are often contested and saturated with different interests especially in relation to future generations he also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future the future seems to be characterized by wicked problems there are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake urry explores these issues through case studies of 3d printing and the future of manufacturing mobilities in the city and the futures of energy and climate change

master s thesis from the year 2021 in the subject business economics market research grade 1 0 accadis hochschule bad homburg language english abstract mobile payment systems are an innovation that allows people to make contactless payments with a mobile device such as a smartphone at the cash register in brick and mortar retail outlets without carrying a wallet with credit and debit cards while other countries have almost entirely adopted and integrated this innovation into their daily lives adoption rates in germany remain significantly low hence the objective of this work is to analyze the future of mobile payment systems in germany with respect to the reasons for adoption or refusal in particular the following research question was addressed will mobile payment methods replace physical cards in germany or will certain factors prevent full adoption

for marc aug best selling author of non places the prevailing idea of the future rests on our present fears of the contemporary world it is to the future that we look for redemption and progress but it is also where we project our personal and apocalyptic anxieties by questioning notions of certainty truth and totality aug finds ways to separate the future from our eternal terrified present and liberates the mind to allow it to conceptualize our possible futures afresh

this volume comprises the papers and debates of the second france ilo symposium on the future of work employment and social protection reflecting the aim of the symposium itself the book provides in depth reflections on work employment and social protection designed to be more than an account of the discussions this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets particularly in the developed world the book discusses the need for more family friendly policies and a more radical policy of equality between the sexes the legal dimensions of labour market

change are also debated and the book explores the positive and negative sides of globalization and its links with technological change

how the future has been imagined and made through the work of writers artists inventors and designers the future is like an unwritten book it is not something we see in a crystal ball or can only hope to predict like the weather in this volume of the mit press s essential knowledge series nick montfort argues that the future is something to be made not predicted montfort offers what he considers essential knowledge about the future as seen in the work of writers artists inventors and designers mainly in western culture who developed and described the core components of the futures they envisioned montfort s approach is not that of futurology or scenario planning instead he reports on the work of making the future the thinkers who devoted themselves to writing pages in the unwritten book douglas engelbart alan kay and ted nelson didn t predict the future of computing for instance they were three of the people who made it montfort focuses on how the development of technologies with an emphasis on digital technologies has been bound up with ideas about the future readers learn about kitchens of the future and the vision behind them literary utopias from plato s republic to edward bellamy s looking backward and charlotte perkins gilman s herland the futurama exhibit at the 1939 new york world s fair and what led up to tim berners lee s invention of the world wide montfort describes the notebook computer as a human centered alternative to the idea of the computer as a room sized giant brain speculative practice in design and science fiction and throughout the best ways to imagine and build the future
