this conference was organised in the framework of a series of initiatives taken by the european commission in order to stimulate reflection and debate on science and technology on a european scale focusing attention on subjects related to historical cultural ethical and social aspects of science and technology the originality of these initiatives conferences when compared with other initiatives in this field was to address the questions dealt with specifically within their european dimension attention was concentrated on the particularity of the situation in the field concerned in europe in comparison with other parts of the world the differences between european countries and regions the aspects related to the process of building europe the needs and possibilities of collaboration at european level etc the conferences organised in this framework have put together a broad spectrum of people from different horizons historians sociologists philosophers specialists in science studies researchers in natural and exact sciences as well as in social sciences and humanities people in charge of research and policy decision makers representatives from the industrial and entrepreneurial world and citizens associations etc organised by national or european institutions each conference drew together between 100 and 200 people the proceedings were systematically published and broadly disseminated

the chapters in this book were first presented at the women in french biennial conference held in leeds in may 2004 the twelve essays explore the multifaceted commodification of the female body and provide insights into the mutations of french society and culture british and french scholars examine the paradoxes and contradictions embodied in various images and discourses related to health and illness from different perspectives ranging from sociological studies to analyses of working diaries children s

medical encyclopaedias and literary texts the resilient female body as epitomised by the first world war nurse tends by the end of the twentieth century to be construed as the sanitised female body subjected to mind body dualities largely controlled by the medical professions thus maternity and related issues such as birth and contraceptive technologies figure as major themes with contributors revealing unresolved ambivalences other chapters focus on how women s economic activity can affect their individual health and potentially that of others a further prominent theme shows how for contemporary women writers serious illnesses such as cancer and madness in women can be seen as rich metaphors for the ills of a male dominated society duras s alcoholism and aragon s portrayals of prostitution are also discussed
