the most popular measure of burnout has been the maslach burnout inventory mbi ever since it was introduced in 1981 maslach jackson 1981 schaufeli enzmman 1998 maslach and jackson 1981 1986 defined burnout as a three dimensional syndrome of emotional exhaustion feeling emotionally drained by one s contact with other people depersonalization negative feelings and cynical attitudes toward the recipients of one s service or care and reduced personal accomplishment a tendency to evaluate negatively one s own work that occurs among individuals who work with people in some capacity contents using the mbi human services survey the mbi general survey the mbi educators survey current and future research

this test manual the fourth in fit s sport and exercise psychology test clearinghouse is a succinct and informative resource outlining the conceptual basis of the athlete burnout syndrome and its measurement the manual delineates the process used in developing the abq and provides users with information on the meaning of scores derived from its use aspects related to the abq are presented in a comprehensive manner athlete burnout questionnaire abq along with the guidelines for administering and scoring it conceptual underpinnings of the abq including an overview of the burnout construct and the operational definition used to guide item development as well as a description of how the preliminary item pool was developed review of research using a within network approach to examining the internal structure of the burnout construct based on the abq plus a description of both internal consistency and stability of abq scores discussion of a between network approach to construct validation by examining the relationship of abq scores to theoretically relevant variables stemming from stress sociological and motivational perspectives on burnout basic descriptive statistical information that can help users interpret the meaning of scores derived from the abq

this book shows how to recognize prevent and cure burnout syndrome for nurses teachers counselors doctors therapists police social workers and anyone else who cares about and for people christina maslach the leading pioneer in research on burnout offers help using illustrative examples and first hand accounts she points out what causes the feelings of emotional exhaustion the callous indifference to people s problems and the sense of inadequacy about one s ability to

help and relate to others

demographic information and measures on the maslach burnout inventory mbi were obtained for 151 ohio licensed psychologists seven independent variables were examined in predicting burnout multiple regression analyses revealed that most psychologists within this sample scored within the low range for all subscales emotional exhaustion ee 57 depersonalization dp 76 personal accomplishment pa 77 number of hours per week providing supervision to others was predictive of burnout on all three subscales additionally age number of hours per week spent teaching and employment setting were predictive of emotional exhaustion subscale scores similarly age and number of hours spent in obtaining supervision were predictive of scores on the depersonalization dp subscale personal accomplishment pa subscale scores were predicted by the variables number of hours per week spent in direct service with clientele and type of employment setting psychologists in private practice reported less burnout than those working in the public sector

burnout is a syndrome composed of emotional exhaustion depersonalization and personal accomplishment resulting from chronic stress the maslach burnout inventory human services survey mbi hss maslach jackson leiter 1996 is the most popular measure of burnout unfortunately the mbi hss has flaws including highly correlated traits and low subscale reliabilities i tested a bifactor model for the mbi hss based on the work by meszaros adam svabo szigeti and urban 2014 using item response theory bifactor models specify a general factor that underlies all the items within a scale and specific factors that underlie the subscale items also all factors are orthogonal i found that the bifactor model had superior fit to the traditional correlated traits a method for decomposing item and test information in multidimensional item response theory is also introduced along with a new method of displaying the test information finally i provide the scoring recommendation that only the general burnout dimension for the mbi hss should be reported as the subscales are unreliable

two pioneering researchers identify key causes of workplace burnout and reveal what managers can do to promote increased productivity and health burnout is among the most significant on the job hazards facing workers today it is also among the most misunderstood in particular we tend to characterize burnout as a personal issue a problem employees should fix themselves by getting therapy practicing relaxation techniques or changing jobs christina maslach and michael p leiter show why this is not the case burnout also needs to be managed by the workplace citing a wealth of

research data and drawing on illustrative anecdotes the burnout challenge shows how organizations can change to promote sustainable productivity maslach and leiter provide useful tools for identifying the signs of employee burnout most often exhaustion cynicism and ineffectiveness they also advise managers on assembling and interpreting worker self evaluation surveys which can reveal workplace problems and potential solutions and when it comes to implementing change maslach and leiter offer practical evidence driven guidance the key they argue is to begin with less taxing changes that employees nonetheless find meaningful seeding the ground for more thorough reforms in the future experts estimate that more than 500 billion and 550 million workhours are lost annually to on the job stress much of it caused by dysfunctional work environments as priorities and policies shift across workplaces the burnout challenge provides pragmatic creative and cost effective solutions to improve employee efficiency health and happiness

seminar paper from the year 2024 in the subject business economics miscellaneous grade 1 0 otto von guericke university magdeburg fww language english abstract this report examines how dispersed work arrangements influence employee burnout and what organisations can do to prevent negative outcomes dispersed work is understood as work that is performed away from a traditional co located office setting including home office unassigned workspaces and global virtual teams while such arrangements promise flexibility autonomy and cost savings they also create risks such as extended working hours blurred boundaries between work and private life social isolation and role conflicts all of which can increase the likelihood of burnout the analysis is grounded in two core theoretical frameworks first media richness theory explains how the effectiveness of different communication media depends on their capacity to transmit rich information and reduce ambiguity in dispersed teams employees rely heavily on technology mediated communication such as email and video conferencing selecting media that are too lean for complex or emotionally sensitive tasks can lead to misunderstandings reduced cohesion and a lack of social support thereby indirectly fuelling stress and burnout second the maslach burnout inventory mbi is used to conceptualise burnout along three dimensions emotional exhaustion depersonalisation and reduced personal accomplishment these dimensions provide a structured lens for understanding how prolonged exposure to high job demands and insufficient resources manifests in individuals drawing on recent research the report highlights both the potential benefits and the risks of dispersed work on the positive side flexible working arrangements can support work life balance enable better alignment of work with personal needs and increase job satisfaction when accompanied by sufficient autonomy and organisational support on the negative side excessive screen time permanent accessibility lack of clear boundaries inadequate managerial support and

poorly designed communication structures can undermine well being and contribute to burnout particular attention is paid to role conflicts for example when employees struggle to reconcile professional and family responsibilities in the same physical space based on these insights the report formulates practical recommendations for organisations
