a witty often terrifying that chronicles our transformation into a society that is shaped by technology from the acclaimed author of amusing ourselves to death a provocative book a tool for fighting back against the tools that run our lives dallas morning news the story of our society s transformation into a technopoly a society that no longer merely uses technology as a support system but instead is shaped by it with radical consequences for the meanings of politics art education intelligence and truth

in response to challenges from the emerging world this book brings together essays that discuss and exemplify various related approaches to academic faith integration and explore how christian faith should underpin scaffold and frame our understanding of academic disciplines leading to practical implications for work or

action in modern society and culture written by christian scholars and practitioners from diverse backgrounds including the usa the uk australia china hong kong south korea and the philippines the contributions here all contribute a global perspective while addressing some specific issue or case in the context of asia they represent ingenious endeavors that illustrate the workings of a faith integrated approach in domains as wide as higher education business science psychology and counseling politics environment media social services leadership research and technology this volume will inform and inspire the reader into cross cultural and inter disciplinary studies particularly of religion education culture society and worldview

from the cars we drive to the instant messages we receive from debate about genetically modified foods to astonishing strides in cloning robotics and nanotechnology it would be hard to deny technology s powerful grip on our lives to stop and ask whether this digitized implanted reality is quite what we had in mind when we opted for progress or to ask if we might not be creating more problems than we solve is likely to peg us as hopelessly backward or suspiciously eccentric yet not only questioning but challenging technology turns out to have a long and noble history in this timely and incisive work nicols fox examines contemporary resistance to technology and places it in a surprising historical context she brilliantly illuminates the rich but oftentimes unrecognized literary and philosophical tradition that has existed for nearly two centuries since the first luddites the machine breaking followers of the mythical ned ludd lifted their sledgehammers in protest against the industrial revolution tracing that current of thought through some of the great minds of the 19th and 20th centuries william blake mary shelley charles dickens john ruskin william morris henry david thoreau ralph waldo emerson robert graves aldo leopold rachel carson and many others fox demonstrates that modern protests against consumptive lifestyles and misgivings about the relentless march of mechanization are part of a fascinating hidden history she shows as well that the luddite tradition can yield important insights into how we might reshape both technology and modern life so that human community and environmental values take precedence over the demands of the machine in against the machine nicols fox writes with compelling immediacy bringing a new dimension and depth to the debate over what technology means both now and for our future

we all live our daily lives surrounded by the products of technology that make what we do simpler faster and more efficient these are benefits we often just take for granted but at the same time as these products disburden us of unwanted tasks that consumed much time and effort in earlier eras many of them also leave us more disengaged from our natural and even human surroundings it is the task of what gene moriarty calls focal engineering to create products that will achieve a balance between disburdenment and engagement how much disburdenment will be appropriate while still permitting an engagement that enriches one s life elevates the spirit and calls forth a good life in a convivial society one of his examples of a focally engineered structure is the golden gate bridge which draws people to it

enlivens and elevates the human spirit and resonates with the world of its congenial setting humans bridge and world are in tune these values of engagement enlivenment and resonance are key to the normative approach moriarty brings to the profession of engineering which traditionally has focused mainly on technical measures of evaluation such as efficiency productivity objectivity and precision these measures while important look at the engineered product in a local and limited sense but from a broader perspective what is locally benign may present serious moral problems undermining social justice environmental sustainability and health and safety of affected parties it is this broader perspective that is championed by focal engineering the subject of part iii of the book which moriarty contrasts with modern engineering in part i and pre modern engineering in part ii

what makes you you is it your mother tongue is it your country of birth is it your ethnicity is it your bank balance or could it be who or what you call god mokokoma takes the reader through a mental tour an exploration of social constructs that have divided the human race i e language culture nationality the monetary system religion ethnicity race et cetera a journey through familiar territories but for a change with an unfamiliar set of eyes if this book does not un divide the human race nothing will mokokoma argues that the civilized man is technologically ahead of but intellectually behind his time this one of a kind life changing book is our opportunity to catch up

does god really matter for today s christians craig gay addresses this issue in his the way of the modern world or why it s tempting to live as if god doesn t exist gay takes a critical look at the modern world and exposes the foundational worldview of contemporary secular society and the ideas that undergird modern culture gay shows how for christians one of the most seductive temptations fostered by these ideas is the temptation toward practical atheism living as if god does not matter practical atheism has become so attractive that even some christian churches have embraced it in the way of the modern world gay describes in detail the far reaching consequences of practical atheism and what it will eventually mean for christians yet gay is not without hope for today s christians arguing for the eviction of certain modern ideas from our churches he shows that there is a biblically sound way to live in but not of the world
