the result of extensive scholarship and consultation with leading scholars this text introduces students to twenty four theorists and compares and contrasts their theories on how we develop as individuals emphasizing the theories that build upon the developmental tradition established by rousseau this text also covers theories in the environmental learning tradition

child development theories and critical perspectives provides an engaging and perceptive overview of both well established and recent theories in child and adolescent psychology this unique summary of traditional scientific perspectives alongside critical post modern thinking will provide readers with a sense of the historical development of different schools of thought the authors also place theories of child development in philosophical and cultural contexts explore links between them and consider the implications of theory for practice in the light of the latest thinking and developments in implementation and translational science early chapters cover mainstream theories such as those of piaget skinner freud maccoby and vygotsky whilst later chapters present interesting lesser known theorists such as sergei rubinstein and more recent influential theorists such as esther thelen the book also addresses lifespan perspectives and systems theory and describes the latest thinking in areas ranging from evolutionary theory and epigenetics to feminism the voice of the child and indigenous theories the new edition of child development has been extensively revised to include considerable recent advances in the field as with the previous edition the book has been written with the student in mind and includes a number of useful pedagogical features including further reading discussion questions activities and websites of interest child development theories and critical perspectives will be essential reading for students on advanced courses in developmental psychology education social work and social policy and the lucid style will also make it accessible to readers with little or no background in psychology

written for undergraduates this book will become crucial to any student wanting a key to unlock the world of child development by ensuring they understand the main concepts in the discipline

theories of development introduces students to the most influential theorists who have contributed to our understanding of how we develop as individuals the book focuses on the theorists who have built upon the developmental tradition established by rousseau along with other theorists including ethologists and psychoanalysts who share a developmental outlook it also considers theorists in the environmental learning theory tradition and discusses the practical implications of all theorists work this edition has been thoroughly updated throughout and now includes a new chapter comparing treatment approaches to autism greater attention to erikson s theory of identity formation and how it pertains to gender issues new thoughts on cultural factors in piaget s theory biographical material on jane goodall howard thurman and albert einstein that illustrate developmental processes demonstrating how we might view the world differently at various stages of life theories of development is a must read for all students of psychology and education

through the evaluation and integration of developmental theories this volume proposes a new structural behavioral model of development Dr Horowitz's model helps account for both the behavioral development of children with extensions across the life span and for the universal and non universal characteristics in human behavioral development exploring developmental theories also sheds a new and different light on the nature nurture or heredity environment controversy and on the topic of continuity and discontinuity in development exploring developmental theories examines the concepts of stage structure and systems organismic theory and general system theory analyzes open and closed systems as well as organismic and mechanistic world views integrates the concepts associated with organismic and mechanistic world views examines learning mechanisms and processes that foster the acquisition of behavior and discusses the strengths and weaknesses of Gesell Piaget and behaviorism in accounting for behavioral development

the authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature they show how theories are specific examples of more general points of view called paradigms the theories chosen to represent the three paradigms the endogenous paradigm exogenous paradigm and the constructivist paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm the authors present the paradigm case in the lead chapter for each paradigm this paradigm case is the best example for the paradigm the authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm

throughout the twentieth century governments sought to achieve development not only in their own countries but also in other regions of the world particularly in Africa Asia Latin America and the Caribbean this focus on development as a goal has continued into the twenty first century for example through the United Nations Millennium Development Targets while development is often viewed as something very positive it is also very important to consider the possible detrimental effects it may have on the natural environment different social groups and on the cohesion and stability of societies in this important book Katie Willis investigates and places in a historical context the development theories behind contemporary debates such as globalization and transnationalism the main definitions of development and development theory are outlined with a description and explanation of how approaches have changed over time the differing explanations of

inequalities in development both spatially and socially and the reasoning behind different development policies are also considered by drawing on pre twentieth century european development theories and examining current policies in europe and the usa the book not only stresses commonalities in development theorizing over time and space but also the importance of context in theory construction this topical book provides an ideal introduction to development theories for students in geography development studies area studies anthropology and sociology it contains student friendly features including boxed case studies with examples definitions summary sections suggestions for further reading discussion questions and website information

provides a clearly written basic introduction to the different theoretical approaches to understanding human development designed for the first year student of human development features an overview and discussion of the maturational biological psychoanalytic behavioral and cognitive developmental theories of human development and includes applied examples of every theory and a set of seven questions used to compare and contrast theories presented throughout the book

in this invaluable introduction to the major post second world war theories of third world development peter preston takes as his focus the strategies used to analyze change in the third world and examines the ways in which different conceptions of the nature of change have led to different lines of policy advice in doing so the author demonstrates how the various contemporary approaches to development draw upon strategies of enquiry which are lodged deep within the intellectual traditions of the modern world the author s approach is based on the premise that the reader can only fully grasp the live issues and debates surrounding development through an understanding of the linkages with the broader frameworks of social theory the volume is organized into four major sections an introduction to the nature of social scientific analysis a review of the work of the major social scientific figures of the nineteenth century and their impacts in the twentieth a comprehensive discussion of the post second world war theories of third world development a prospective study of the current debates within the field of development theory about global structures and agent responses development theory is designed to appeal to students across a wide range of disciplines who are taking courses dealing with aspects of development

development theory in the past decade has met with increasingly heavy criticism dependency theories as well as modes of production and world system approaches have come to be considered as internally inconsistent and inadequate for explaining the increasing diversity and

unevenness of the third world this book confronts the theoretical impasse which many feel has been reached development scholars from various disciplines review recent changes in research priorities procedures and orientations and detect the emergence of new and diverse lines of theoretical development in the field in particular they deal with the important meta theoretical political cultural and ethical questions that have come to the fore

intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the past 20 years this period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past in addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions
