Paper Start with a good quality drawing paper Smooth white paper is ideal for beginners as it allows for clean lines and easy corrections You can experiment with different textures later on

Pencils A set of graphite pencils with varying degrees of hardness will give you control over line weight and shading Beginners can start with a 2H hard pencil for light lines and a 4B soft pencil for darker lines

Eraser A good quality eraser is crucial for correcting mistakes and adjusting your drawing A kneaded eraser is ideal for lifting subtle amounts of graphite

Sharpener A sharpener is essential for keeping your pencils in top shape A mechanical pencil with replaceable lead is a good alternative for those who prefer a consistent line width

Drawing Board A drawing board provides a stable surface for your paper and prevents it from moving around A clipboard or even a flat surface can be used in a pinch

2 Mastering the Basics

Drawing begins with understanding the fundamentals

Lines Practice drawing straight lines curved lines and different shapes Start with simple geometric forms like squares circles and triangles Focus on achieving smooth consistent lines

CrossHatching

Crosshatching involves creating layers of parallel lines that intersect to create tonal variations. It's a great way to achieve depth and texture in your drawings.

Stippling

Stippling involves creating patterns of small dots to represent shading and tone. This technique requires patience but can create incredibly detailed and realistic effects.

Blending

Blending involves using a blending tool like a paper stump or your finger to soften the edges of pencil lines and create smooth transitions between shades.

many parts of the country that is why what is considered sustainable and organic gardening in the west today was an integral part of human existence in the indian subcontinent at that time we used organic fertilizer we did not know about chemical pesticides or hormones on the flipside we did not know about agricultural development which was taking place all over the world to get a better yield of food and crops and that is why we relied on just the monsoon to feed our crops and prayed to the rain god if he did not come on time we would be sunk the bank and the money lender would take our land and then there would be no resort but to starve or go to the city to survive or lend ourselves out in bonded labor to a more prosperous farmer this may sound shocking to people in well developed countries but this is still the sort of existence which is being led by people in many parts of the world even today in this day of state of the art technology and technological development underdeveloped countries still follow obsolete agricultural practices which do not take into account the natural resources already around them and so famine has been a part of their lives for centuries so here are some rules which you are going to implement right now to make sustainable gardening possible
