the authors assert that traditional sociological theories of human nature and society

do not pay sufficient attention to the evolution of big brained hominoids resulting in assumptions about humans propensity for groupness that go against the record of primate evolution when this record is analyzed in detail and is supplemented by a review of the social structures of contemporary apes and the basic types of human societies hunter gathering horticultural agrarian and industrial commonplace criticisms about the de humanizing effects of industrial society appear overdrawn if not downright incorrect the book concludes that the mistakes in contemporary social theory as well as much of general social commentary stem from a failure to analyze humans as big brained apes with certain phylogenetic tendencies this failure is usually coupled with a willingness to romanticize societies of the past notably horticultural and agrarian systems

if evolution has changed humans physically has it also affected human behavior drawing on evolutionary psychology sociobiology and human behavioral ecology human nature and the evolution of society explores the evolutionary dynamics underlying social life in this introduction to human behavior and the organization of social life stephen k sanderson discusses traditional subjects like mating behavior kinship parenthood status seeking and violence as well as important topics seldom included in books of this type especially gender economies politics foodways race and ethnicity and the arts examples and research on a wide range of human societies both industrial and nonindustrial are integrated throughout with chapter summaries of key points thoughtful discussion questions and important terms defined within the text the result is a broad ranging and comprehensive consideration of human society thoroughly grounded in an evolutionary perspective
