this book contains 36 chapters and is structured to facilitate readers to grasp concepts understand implementation procedures learn command syntax configuration files and daemons involved and understand basic troubleshooting the 36 chapters are divided into three key areas unix fundamentals hp ux system administration and hp ux network administration these chapters cover topics that are on hp s recommended certification courses unix fundamentals system and network administration i system and network administration ii and hp ux for experienced unix system administrators as well as on official exam objectives list 1 unix fundamentals chapters 1 to 6 and 22 covers the basics of unix and hp ux most information is not specific to a particular unix flavor rather includes general unix concepts file manipulation and security techniques vi editor shell and awk programming basic commands and other essential topics unlike many other similar books a chapter on shell scripting is presented after covering hp ux system administration area this is done purposely to provide readers with practical examples based on the knowledge they gain from unix fundamentals and hp ux system administration chapters 2 hp ux system administration chapters 7 to 21 covers the hp ux specific system administration concepts and topics including server hardware information and mass storage stack virtualization technologies and hp ux installation software and patch management user and group administration lvm and file system administration evfs and swap management system shutdown and startup procedures kernel configuration and management techniques backup and restore functions printer and print request management job automation and process control and system logging and performance monitoring 3 hp ux network administration chapters 23 to 36 covers hp ux network and security administration concepts and topics such as osi and tcp ip reference models network hardware overview and lan interface administration ip subnetting and routing techniques basic network testing and troubleshooting internet services and sendmail time synchronization ntp and resource sharing nfs autofs and cifs services naming dns nis and ldap services and automated installation techniques and high availability concepts and system security tools and practices throughout the book figures tables screen shots and examples are given for explanation purposes the book includes 863 exam review questions with answers

user models have recently attracted much research interest in the field of artificial intelligence dialog systems it has become evident that flexible user oriented dialog behavior of such systems can be achieved only if the system has access to a model of the user containing assumptions about his her background knowledge as well as

his her goals and plans in consulting the system research in the field of user models investigates how such assumptions can be automatically created represented and exploited by the system in the course of an on line interaction with the user the communication medium in this interaction need not necessarily be a natural language such as english or german formal interaction languages are also permitted the emphasis is placed on systems with natural language input and output however a dozen major and several more minor user modeling systems have been designed and implemented in the last decade mostly in the context of natural language dialog systems the goal of um86 the first international workshop on user modeling was to bring together the researchers working on these projects so that results could be discussed and analyzed and hopefully general insights be found that could prove useful for future research the meeting took place in maria laach a small village some 40 miles south of bonn west germany 25 prominent researchers were invited to participate

since the first interact conference in september 1984 the field of human computer interaction has received increasing attention from researchers and industrial practitioners the importance of the topic now being widely recognized technological developments have made it possible to seek new solutions to the problem of supporting work processes by information technology and for designing the interface between user and the machine computers have become an everyday and common tool in the work of many people this has motivated the development of an interdisciplinary field of research which now appears much more established than it was a few years ago the interact forums provide the opportunity for regular presentation and discussion of new results from research and application by bringing together the various disciplines and research approaches on a worldwide basis
