non linearity arises in statistical inference in various ways with varying degrees of severity as an obstacle to statistical analysis more entrenched forms of nonlinearity often require intensive numerical methods to construct estimators and the use of root search algorithms or one step estimators is a standard method of solution this book provides a comprehensive study of nonlinear estimating equations and artificial likelihood s for statistical inference it provides extensive coverage and comparison of hill climbing algorithms which when

started at points of nonconcavity often have very poor convergence properties and for additional flexibility proposes a number of modification to the standard methods for solving these algorithms the book also extends beyond simple root search algorithms to include a discussion of the testing of roots for consistency and the modification of available estimating functions to provide greater stability in inference a variety of examples from practical applications are included to illustrate the problems and possibilities thus making this text ideal for the research statistician and graduate student

this book provides an introduction to the algebraic theory of semirings including a detailed treatment of some applications in theoretical computer science the focus is on the general concepts and statements of the algebraic theory of semirings and those aspects of the theory which are needed for the aforementioned applications the book also deals with a concept of semirings that includes commutativity of addition as is usually done for rings
