selwyn goldsmith s designing for the disabled has since it was first published in 1963 been a bible for practising architects around the world now as a new book with a radical new vision comes his designing for the disabled the new paradigm goldsmith s new paradigm is based on the concept of architectural disability as a version of the social model of disability it is not exclusively the property of physically disabled people others who are afflicted by it include women since men customarily get proportionately four times as many amenities in public toilets as women and women have to queue where men do not and those with infants in pushchairs because normal wc facilities are invariably too small to get a pushchair and infant into to counter architectural disability goldsmith s line is that the axiom for legislation action has to be access for everyone it should not just be access for the disabled as it presently is with the part m building regulation and relevant provisions of the 1995 disability discrimination act in a 40 page annex to his book he sets out the terms that a new style part m regulation and its approved document might take

one that would cover alterations to existing buildings as well as new buildings but architects and building control officers need not he says wait for new a legislation to apply new practical procedures to meet the requirements of the current part m regulation they can as he advises act positively now this is a book which will oblige architects to rethink the methodology of designing for the disabled it is a book that no practising architect building control officer local planning officer or access officer can afford to be without
