english contract law provides the invisible framework that underpins and enables much contracting activity in society yet the role of the law in policing many of our contracts now approaches vanishing point the methods by which contracts come into existence and notionally create binding obligations have transformed over the past forty years consumers now enter into contracts through remote and automated processes on standard terms over which they have little control this book explores the substantive weakening of the institution of contract law in a society heavily dependent on contracts it considers significant areas of contracting activity that affect many people but that escape serious and sustained legal scrutiny an accessibly written and succinct account of

contract law's past, present and future. It assesses the implications of a diminished contract law and the possibilities if any for its revival.

This text considers the developing law in England and Wales as it applies to the burgeoning and confusing subject of the rights of children. It examines the extent to which the emerging legal principles can be harnessed to fulfil those rights.

In this indispensable textbook, Simon Baughen expertly covers the whole spectrum of English shipping law, placing the highly specialised rules of shipping in a commercial context and relating them to the general principles of contract and tort law. The 8th edition is brought fully up to date, covering all the relevant legal implications following on from Brexit. In-depth commentary on judicial decisions and well-balanced coverage and analysis of recent and key cases provide an up-to-date reference for students on shipping law courses. All key topics are comprehensively covered, including bills of lading, charterparties, salvage, marine pollution, jurisdiction, choice of law, arbitration and accidents and collisions. Continuing significant and noteworthy developments in shipping law are explored in this new edition, such as the introduction into the House of Lords in October 2022 of the Electronic Trade Documents Bill. The field of international conventions has also seen several changes since the previous edition. Shipping law provides an invaluable source of reference both for students and those in practice. The book's accessible narrative and useful glossary of key terms will especially benefit students new to shipping law or from non-law backgrounds.

From Trump's 'Make America Great Again' to Johnson's 'Build Back Better', performative politicians use the 'making sense' to persuade their public audiences. Law makers do it too. A courtroom trial is a truth factory in which facts are not found but forged. The court of popular opinion is another such factory, though its processes are often flawed and its products faulty. Where courts of law aim to make civil peace, trial by Twitter makes civil strife. Even in mainstream media, journalists make news for public consumption so that all news is to an extent fake news in a world of 'making how'. How can we separate craft from craftiness with insights from disciplines including law, politics, rhetoric, media studies, psychology, sociology, marketing and performance studies? The 'making sense' of politics, media and law offers a constructive way to approach controversies from transgender identity to cancel culture. This title is also available as open access on Cambridge Core.
