how could a community of 2000 3000 viking peasants survive in arctic greenland for 430 years ca 985 1415 and why did they finally disappear european agriculture in an arctic environment encountered serious ecological challenges the norske peasants faced these challenges by adapting agricultural practices they had learned from the atlantic and north sea coast of norway norske greenland was the stepping stone for the europeans who first discovered america and settled briefly in newfoundland ca ad 1000 the community had a global significance which surpassed its modest size in the last decades scholars have been nearly unanimous in emphasising that long term climatic and environmental changes created a situation where norske agriculture was no longer sustainable and the community was ruined a secondary hypothesis has focused on ethnic confrontations

between Norse peasants and Inuit hunters in the last decades ethnic violence has been on the rise in Eastern Europe, the Middle East and parts of Africa. In some cases it has degenerated into ethnic cleansing. This has strengthened the interest in ethnic violence in past societies. Challenging traditional hypotheses is a source of progress in all science. The present book does this on the basis of relevant written and archaeological material respecting the methodology of both sciences.

This volume explores the political, cultural and ecclesiastical forces that linked the metropolis of Byzantium to the margins of its far-flung empire, focusing on the provincial region of Hellas and Peloponnesos in central and southern Greece. Judith Herrin shows how the prestige of Constantinople was reflected in the military, civilian and ecclesiastical officials sent out to govern the provinces. She evokes the ideology and culture of the center by examining different aspects of the imperial court, including diplomacy, ceremony, intellectual life and relations with the church. Particular topics treat the transmission of mathematical manuscripts, the burning of offensive material and the church's role in distributing philanthropy. Herrin contrasts life in the capital with provincial life, tracing the adaptation of a largely rural population to rule by Constantinople from the early medieval period onward. The letters of Michael Choniates, Archbishop of Athens from 1182 to 1205, offer a detailed account of how this highly educated cleric coped with life in an imperial backwater and demonstrate a synthesis of ancient Greek culture and medieval Christianity that was characteristic of the Byzantine elite. This collection of essays spans the entirety of Herrin's influential career and draws together a significant body of scholarship on problems of empire. It features a general introduction, two previously unpublished essays and a concise introduction to each essay that describes how it came to be written and how it fits into her broader analysis of the unusual brilliance and longevity of Byzantium.
