introduction to the knowledge and skills needed to manage all linux distributions covers  
the objectives for the comtia linux certification exam and the novell certification linux  
professional novell clp practicum exam

the importance of training and education is on the increase while the production of  
human capital is seen as a motor for a competitive economy skills and expertise proof  
to be necessary for social mobility remarkably in conceiving modern forms of  
apprenticeship several mechanisms from the acien regime seem to return the  
difference between public and private initiative is disappearing education and training is  
being confused and in order to acquire generic skills as flexibility communicability self  
rule creativity and so on youngsters have to learn in context even for maths scholars  
now talk of situated learning before the advent of a formal schooling system training  
took place on the shop floor under the roof of a master the apprentice not only worked  
but also lived in his master s house and was thus trained and educated at the same  
time in cities this system was formally complemented by an official apprenticeship  
system prescribing a minimum term to serve and an obligatory masterpiece for those  
who wanted to become masters themselves traditionally historians see this as an

archaic and backward way of training yet this book's aim is to show that it was instead a very flexible and dynamic system perfectly in tune with the demands of an early modern economy in order to understand it fully however we should differentiate the informal training system organised via a free market of indentures on the one hand and the institutionalised system of craft guilds on the other in antwerp early modern guilds had a project of emancipating their members they didn't simply produce certain skills but through a system of quality marks defended the honour of craftsmen this is the difference with current practices by representing hands on skills as superior guilds supplied a sort of symbolic capital for workers

this book introduces readers to the basics of novell's suse linux enterprise server configuration and administration hands on labs and plenty of practical examples will guide learners in the management of users file systems software system initialization and processes in addition readers will explore the configuration and maintenance of various network services used on local and remote networks at the end of the book a series of questions fuse the essential principles with additional discovery exercises to help users prepare for the novell certified linux professional clp practicum certification exam back cover
