this major new study of heidegger is the first to examine in detail the concept of existential truth that heidegger developed in the 1920s daniel dahlstrom offers a critical focus on the genesis nature and viability of heidegger s radical reconceptualization the book has several distinctive and innovative features first it is the only study that attempts to understand the logical dimension of heidegger s thought in its historical context second no other book length treatment

explores the breadth and depth of heidegger s confrontation with husserl his erstwhile mentor third the book demonstrates that heidegger s deconstruction of western thinking occurs on three interconnected fronts truth being and time

this book provides new interpretations of heidegger s philosophical method in light of 20th century postmodernism and 21st century speculative realism in doing so it raises important questions about philosophical method in the age of global warming and climate change vincent blok addresses topics that have yet to be extensively discussed in heidegger scholarship including heidegger s method of questioning the religious character of heidegger s philosophical method and heidegger s conceptualization of philosophical method as explorative confrontation he is also critical of heidegger s conceptuality and develops a post heideggerian concept of philosophical method which provides a new perspective on the role of willing poetry and earth interest in contemporary philosophy this earth interest turns out to be particularly important to consider and leads to critical reflections on heidegger s concept of earth the necessity of earth interest in contemporary philosophy and a post heideggerian concept of the earth heidegger s concept of philosophical method will be of interest primarily to heidegger scholars and graduate students but its discussion of philosophical method and environmental philosophy will also appeal to scholars in other disciplines and areas of philosophy

a new translation of heidegger s early work the realities problem in modern philosophy originally published in 1912 under the german title das realitats problem in der modernen philosophie this edition contains a new afterword by the translator a timeline of heidegger s life and works a philosophic index of core heideggerian concepts and a guide for existentialist terminology across 19th and 20th century existentialists this translation is designed for readability and accessibility to heidegger s enigmatic and dense philosophy complex and specific philosophic terms are translated as literally as possible and academic footnotes have been removed to ensure easy reading this work is critical to understand his initial approach to ontochronology leading to his advanced theories on the phenomenology of time in his major work being and time heidegger argues here that time in the historical sciences is not a homogeneous mathematical series as it is in physics but rather a qualitative context dependent concept he emphasises the importance of understanding time in relation to the specific aims and methodologies of historical science and posits that time in history has a unique meaning and function deeply bound up with the cultural and human context of historical events this approach reflects a broader philosophical inquiry into the nature of being and temporality that heidegger would develop in his later works metaphysics has triumphed over rationalism and empiricism as the only field that is vectored towards the only question that matters

heidegger s lecture course at the university of marburg in the summer of 1925 an early version of

being and time 1927 offers a unique glimpse into the motivations that prompted the writing of this great philosopher s master work and the presuppositions that gave shape to it the book embarks upon a provisional description of what heidegger calls dasein the field in which both being and time become manifest heidegger analyzes dasein in its everydayness in a deepening sequence of terms being in the world worldhood and care as the being of dasein the course ends by sketching the themes of death and conscience and their relevance to an ontology that makes the phenomenon of time central theodore kisiel s outstanding translation premits english speaking readers to appreciate the central importance of this text in the development of heidegger s thought

the concept of time presents heidegger s so called dilthey review widely considered the first draft of his celebrated masterpiece being and time here heidegger reveals his deep commitment to wilhelm dilthey and count yorck von wartenburg he agrees with them that historicity must be at the centre of the new philosophy to come however he also argues for an ontological approach to history from this ontological turn he develops the so called categories of dasein this work demonstrates heidegger s indebtedness to yorck and dilthey and gives further evidence to the view that thought about history is the germ cell of being and time however it also shows that heidegger s commitment to dilthey was not without reservations and that his analysis of dasein actually employs husserl s phenomenology the work reopens the question of history in a broader sense as heidegger struggles to thematize history without aligning it with world historical events the text also provides a concise and readable summary of the main themes of being and time and as such is an ideal companion to that text

this volume presents heidegger s 1924 marburg lectures which lay the intellectual groundwork for his magnum opus being and time here are the seeds of the ideas that would become heidegger s unique and highly influential phenomenology heidegger interprets aristotle s rhetoric and looks closely at the greek notion of pathos these lectures offer special insight into the development of his concepts of care and concern being at hand being in the world and attunement which were later elaborated in being and time available in english for the first time these lectures make a significant contribution to ancient philosophy aristotle studies continental philosophy and phenomenology

the author presents a revised version of his ph d thesis carried out at claremont school of theology he examines the development of the concept of freedom as a dialogue of differing and sometimes conflicting definitions within a philosophical tradition martin luther and kierkegaard are the central figures of his analysis annotation copyrighted by book news inc portland or

this is a book on human dwelling the word dwelling here means something more than having a

roof over our head and a certain number of square feet it means to meet outher for exchange of products ideas and feelings it means to come to an agreement with others it means to be oneself having a small chosen world of our own

this study examines the complex relationship between martin heidegger s concept of difference and jacques derrida s neologism différance in light of the problem of being set in a theological context it argues that derrida s reflections call into question heidegger s account of difference thus problematizing the seinsfrage and forestalling any theological appropriation of being further it argues that derrida s discourse on différance is itself paradoxical indicating its status is logically undecidable inspired by heidegger s charge to think the difference this work characterizes derrida s thought as a response to this mandate and takes as its own task the further thinking through of the problematics of difference in these thinkers

an exciting new book examining the concept of life in adorno s philosophy relating this concept to a number of key thinkers in the history of continental philosophy including marx hegel heidegger agamben

a well crafted and careful rendering of an important and demanding volume covering the philosopher s views on language life and politics andrew mitchell emory university in these lectures delivered in 1933 1934 while he was rector of the university of freiburg and an active supporter of the national socialist regime martin heidegger addresses the history of metaphysics and the notion of truth from heraclitus to hegel first published in german in 2001 these two lecture courses offer a sustained encounter with heidegger s thinking during a period when he attempted to give expression to his highest ambitions for a philosophy engaged with politics and the world while the lectures are strongly nationalistic they also attack theories of racial supremacy in an attempt to stake out a distinctively heideggerian understanding of what it means to be a people this careful translation offers valuable insight into heidegger s views on language truth animality and life as well as his political thought and activity

this work offers a critical examination of how heidegger uses the concept of mood in his philosophy of being the author focuses on a specific kind of mood namely anxiety distinguishing this authentic mood from inauthentic ones and then extends the concept outward to encompass rudolf otto s phenomenology of religious feeling by providing a ground for that work there are four stages in the development of the work each taking up a chapter the first provides an introductory basis for understanding heidegger s project in his being and time through a detailed analysis of his basic terms in chapter two the author turns to the role of mood in disclosing self and world in chapter three the author addresses himself to the marxist interpretation of alienation and the criticism of certain marxists concerning heidegger s concept of anxiety as not

being socially based but merely psychologically based in this context the author refers to the works of adorno kosik lukacs marcuse and kolakowski the focus is on such issues as authenticity freedom and death the fourth and final chapter extends heidegger s remarks concerning mood into the realm of religious mood
