this is an updated version of the best selling first edition ecological census techniques with updating some new chapters and authors almost all ecological and conservation work involves carrying out a census or survey this practically focussed book describes how to plan a census the practical details and shows with worked examples how to analyse the results the first three chapters describe planning sampling and the basic theory necessary for carrying out a census in the subsequent chapters international experts describe the appropriate methods for counting plants insects fish amphibians reptiles mammals and birds as many censuses also relate the results to environmental variability there is a chapter explaining the main methods finally there is a list of the most common mistakes encountered when carrying out a census

in provocative terms that push the envelope of technical administrative and legal capabilities swanson and walashek propose a re vamped us census based neither on the current system self enumeration nor its predecessor door to door canvassing instead they propose that it be built on a combination of four elements 1 administrative records 2 the continuously updated master address file 3 survey data and 4 modeling and imputation techniques they use census enhanced master address file cema as a descriptive term for their proposal which is based on four principles and includes a proposal for an independent census bureau they argue that evidence suggests that the methods used to conduct traditional census counts may be at the end of their useful working lives as evidenced by increasing costs and declining response rates some of their ideas will seem farfetched however swanson and walashek believe this is the time to discuss radical proposals as governments re examine the utility of traditional census counts and consider reductions as is the case in canada and england this

springerbriefs should be on the reading list of staff in statistical agencies grappling with rising costs and declining response rates as well as census stakeholders concerned about costs accuracy and census utility
