with decentralization and urbanization the debts of state and local governments and of quasi public agencies have grown in importance. Rapid urbanization in developing countries requires large scale infrastructure financing to help absorb influxes of rural populations. Borrowing enables state and local governments to capture the benefits of major capital investments immediately and to finance infrastructure more equitably across multiple generations of service users. With debt comes the risk of insolvency. Subnational debt crises have reoccurred in both developed and developing countries. Restructuring debt and ensuring its sustainability confront moral hazard and fiscal incentives in a multilevel government system. Individual subnational governments

might free ride common resources and public officials at all levels might shift the cost of excessive borrowing to future generations this book brings together the reform experiences of emerging economies and developed countries written by leading practitioners and experts in public finance in the context of multilevel government systems the book examines the interaction of markets regulators subnational borrowers creditors national governments taxpayers ex ante rules and ex post insolvency systems in the quest for subnational fiscal discipline such a quest is intertwined with a country's historical political and economic context the formal legal framework interacts with political reality to influence the dynamics of and incentives for reform often the resolution of a subnational debt crisis unfolds in the context of macroeconomic stabilization and structural reforms the book includes reforms that have not been covered by previous literature such as those of china colombia france hungary mexico and south africa the book also presents a comprehensive review of how the united states developed its debt market for state and local governments through a series of reforms that are path dependent including the reforms and lessons learned following state defaults in the 1840s and the debates that shaped the enactment of chapter 9 of the bankruptcy code in 1937 looking forward pressures on subnational finance are likely to continue from the fragility of global recovery the potentially higher cost of capital refinancing risks and sovereign risks this book is essential reading for anyone wanting to know the challenges and reform options in debt restructuring insolvency frameworks and public debt market development

taxes are a crucial policy issue especially in developing countries just recently proposals to raise middle class taxes toppled the bolivian government and plans to extend or increase the value added tax caused political unrest in ecuador and mexico despite the impact of tax policy on developing countries a comprehensive study has yet to be written treating argentina brazil india kenya korea and russia as key case studies this volume outlines the major aspects of current tax codes and explores their economic and political implications examples of both the poorest and wealthiest developing countries argentina brazil india kenya korea and russia uniquely demonstrate the diverse fiscal problems of tax reform each economy relies heavily on indirect and corporate income taxes though recently some have reduced their tariff rates and have switched from excise to value added taxes there is a large informal economy in most of these countries and tax evasion by firms is a significant concern as a result tax revenue remains low even though rates are as high as those in developed economies also unconventional methods to collect revenue have been implemented including bank debit taxes state ownership of firms and implicit taxes on individuals in the informal sector exploring these and other concerns as well as changes in tax law administration and fiscal pressures this comprehensive anthology clarifies the current landscape of tax administration and the economic future of the world's poorer economies

brazil is a country of extreme inequalities one of the most important of which is the acute concentration of rural land ownership in recent decades however poor landless workers have mounted a major challenge to this state of affairs a broad grassroots social movement led by the movement of landless rural workers mst has mobilized

hundreds of thousands of families to pressure authorities for land reform through mass protest this book explores the evolution of the landless movement from its birth during the twilight years of Brazil's military dictatorship through the first government of Luiz Inácio Lula da Silva it uses this case to test a number of major theoretical perspectives on social movements and engages in a critical dialogue with both contemporary political opportunity theory and Mancur Olson's classic economic theory of collective action Ondetti seeks to explain the major moments of change in the Landless Movement's growth trajectory its initial emergence in the late 1970s and early 80s its rapid takeoff in the mid 1990s its acute but ultimately temporary crisis in the early 2000s and its resurgence during Lula's first term in office he finds strong support for the influential but much criticized political opportunity perspective at the same time however he underscores some of the problems with how political opportunity has been conceptualized in the past the book also seeks to shed light on the anomalous fact that the Landless Movement continued to expand in the decade following the restoration of Brazilian democracy in 1985 despite the general trend toward social movement decline his argument which highlights the unusual structure of incentives involved in the struggle for land in Brazil casts doubt on a key assumption underlying Olson's theory

contains scholarly evaluations of books and book chapters as well as conference papers and articles published worldwide in the field of Latin American studies covers social sciences and the humanities in alternate years

Architecture of Brazil 1900-1990 examines the processes that underpin modern Brazilian architecture under various influences and characterizes different understandings of modernity evident in the chapter topics of this book accordingly the author does not give overall preference to particular architects nor works with the exception of a few specific works and architects including Warchavchik Niemeyer Lucio Costa and Vilanova Artigas

corporatism as a particular form of the representation of interests within the state apparatus of contemporary societies has been one of contemporary political science's most popular objects of analysis the concept itself focuses on the character of interest based associations and the type of relationship that they established with the state from this perspective corporatism's distinctive trait is the existence of non competitive compulsory associations that are hierarchically ordered and functionally differentiated recognised authorised or even created by the state which acquire a deliberate monopoly over representation within their category in exchange for which they are expected to comply with certain control over the choice of leadership and the articulation of demands a distinction has been made between societary corporatism and state corporatism the former refers to a situation in which the typical form of organisation for the representation of interests flows from the social groups which have been able to impose themselves on the state thus gaining recognition as privileged interlocutors however when the characteristics of these organisations as well as their recognition or their very creation has been imposed by the state upon social groups and classes we can speak of state corporatism the chapters in this book analyse the brazilian economy during several periods illustrating different governmental attitudes towards the economy in times of prosperity and crisis primarily these attitudes are either free market or regulatory
