now in a thoroughly revised and updated edition this textbook examines the dramatic changes wrought by ideological and economic forces unleashed by the end of the cold war saul bernard cohen one of the world s leading political geographers considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations beginning with a survey of geopolitics and its practitioners saul bernard cohen explains geopolitical terms structure and theory he traces the geopolitical restructuring of the world s different regions its major powers and the global networks that link them thus creating a map of dynamic equilibrium cohen illustrates why those regions the convergence of what he terms the maritime heartlandic russian and east asian realms have become gateways

while the middle east remains a shatterbelt and much of south america and sub saharan africa have grown marginalized the author argues that whether certain areas become gateways or shatterbelts is the key question influencing global stability for example the future of peripheral parts of the eurasian heartland eastern europe the trans caucasus and central asia depends on whether the major powers adopt policies of accommodation or competition cohen analyzes especially the current forces favoring accommodation including the economic benefits of globalization and the common battle against terrorism presenting a global spatial scope the book considers the entire hierarchy of geopolitical units subnational national states and quasi states geopolitical regions and geostrategic realms by emphasizing the interaction between geographical settings and changing ideological and economic forces cohen has succeeded in creating a new global geopolitical map

the international encyclopedia of human geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas the encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world this groundbreaking project covers every field of human geography and the discipline s relationships to other disciplines and is global in scope involving an international set of contributors given its broad inclusive scope and unique online accessibility it is anticipated that the international encyclopedia of human geography will become the major reference work for the discipline over the coming decades the encyclopedia will be available in both limited edition print and online via sciencedirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy for more information

international frontiers and boundaries separate land rivers and lakes subject to different sovereignties frontiers are zones of varying widths and they were common many centuries ago by 1900 frontiers had almost disappeared and had been replaced by boundaries that are lines the divisive nature of frontiers and boundaries has formed the focus of inter disciplinary studies by economists geographers historians lawyers and political scientists scholars from these disciplines have produced a rich literature dealing with frontiers and boundaries the authors surveyed this extensive literature and the introduction reveals the themes which have attracted most attention following the introduction the book falls into three sections the first section deals systematically with frontiers boundary evolution and boundary disputes the second section considers aspects of international law related to boundaries it includes chapters dealing with international law and territorial boundaries maps as evidence of international boundaries and river boundaries and international law the third section consists of seven regional chapters that examine the evolution of boundaries in the americas the middle east africa asia europe islands off southeast asia and antarctica

geography of international affairs

this volume is concerned with the european north above the arctic circle and its representations in cultural geography and international relations

the chapters in the book deal with cultural geographical and political imaginations of northern peoples and landscapes emphasis is placed on the triangle of and interrelationship between culture geography and politics

the discipline of geography has undergone much change and growth in recent years with growth has come diversity before 1945 there were differences between countries in the emphases on subject matter and research approach although these were all related closely to three main models french german and american since then the relative importance of french and german influences has declined substantially including within their own national territories and the anglo american model has grown to world dominance with that model however there is no dominant point of view but rather a multiplicity of competing approaches these various approaches have had a different reception in other parts of the world reflecting the base of pre 1945 geographical scholarship the goals of geographical work set by societies and the nature of the international contacts the result is substantial international diversity in the practice of geography this authoritative volume provides much needed information to make them aware of current international trends

excerpt from the international geography the teacher interested in his work will not fail to develop the diagrammatic treatment of statistics and guard his pupils against the delusion that there is any virtue in remembering exact figures of population or of trade or of other matters which are constantly changing it is a good plan to encourage drawing and colouring the flags of the different countries correctly and to use the flag as the symbol of the country whenever it is possible to do so an incident which occurred on the landing of king edward vii at lisbon on an official visit

might well be remembered a strip of carpet laid on the muddy quay proved too short and was supplemented at the last moment by a large portuguese flag when the king came to the flag of the country he was visiting he stepped off in the mud rather than trample upon it the recognition of the flag as the highest expression of the individuality of a country has led to the introduction in the text of numerous illustrations of flags and colonial badges it is worth suggesting to teachers the preparation of an illustrated geography of the greatest interest by gradually forming an album of picture post cards each card being selected to show some characteristic view or scene most picture post cards would be rejected but the few retained would be found of permanent value about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this proceedings book addresses the main issues of contemporary political geography and international relations providing a platform for discussion and collaboration of experts in the fields of political geography geopolitics international relations and international law participants from all over the world consider the controversies and challenges posed by globalization focusing in particular on the ideologies of globalization and regionalism migration crises prevention of ethnic conflicts and measures to counteract racism xenophobia and extremism

this comprehensive handbook summarizes existing work and presents new concepts and empirical results from leading scholars in the multidisciplinary field of behavioral and cognitive geography the study of the human mind and activity in and concerning space place and environment it provides the broadest and most inclusive coverage of the field so far including work relevant to human geography cartography and geographic information science

the fields of economic geography and international business share an interest in the same phenomena whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena the routledge companion to the geography of international business explores the nature and scope of inter disciplinary work between economic geography and international business in explaining the central issues in the international economy contributions written by leading specialists in each field including some chapters written by inter disciplinary teams focus on the nature of multinational firms and their strategies where they choose to locate their activities how they create and manage international networks and the key relationships between multinationals and the places where they place their operations topics covered include the internationalisation of service industries the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge goods and services flow between locations the book examines the areas for fruitful inter disciplinary work between international business and economic geography and sets out a road map for future joint research and is an essential resource for students and practitioners of international business and economic development

this book brings together recent papers which make important contributions to understanding and developing primary geography it considers primary teachers and trainee teachers knowledge of geography how the primary curriculum uses geography teachers planning of geography teaching the way in which aspects of geography are taught what high quality geography might look like and children s geographical understanding and voices though geography curricula change quite often in countries around the world the core matters noted above remain of constant and vital importance the papers in this book either concern research with primary teachers and children or consider key concerns in primary geography providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools this is a stimulating and enticing collection written by leading exponents of and experts in primary geography education this book was originally published as a special issue of education 3 13
