around the world the need for highly trained scientists and technicians remains high especially for positions that require employees to have a college degree and skills in math science and technology the pipeline into these jobs begins in high school but many leaks occur before young people reach the highly educated workforce needed to sustain leadership in science and technology students drop out of the educational pipeline in science and technology at alarming rates at each educational transition beginning in high school but women and ethnic minority youth drop out at a faster rate women and minorities are consistently underrepresented in science and engineering courses and majors they account for a small portion of the work force in high paying and more innovative jobs that require advanced degrees this schism between the skills necessary in our ever changing

economy and the skill set that most young adults acquire is troubling it leads us to ask the question that forms the basis for this issue why are adolescents and young adults particularly women and minorities opting out of the math science and technology pipeline the volume addresses gender and ethnic differences in the math science and technology pipeline from multiple approaches including theoretical perspectives a review of the work in this field presentation of findings from four longitudinal studies and a discussion of research implications given the current educational and economic climate this is the 110th issue of the jossey bass quarterly report series new directions for child and adolescent development

in this work of historically informed political theory kimberly smith sets out to understand how nineteenth century americans answered the question of how the people should participate in politics did rational public debate the ideal that most democratic theorists now venerate transcend all other forms of political expression how and why did passion disappear from the ideology if not the practice of american democracy to answer these questions she focuses on the political culture of the urban north during the turbulent jacksonian age roughly 1830 50 when the shape and character of the democratic public were still fluid smith s method is to interpret in light of such popular discourse as newspapers and novels several key texts in nineteenth century american political thought frederick douglass s fourth of july speech and narrative angelina grimke s debate with catharine beecher frances wright s lectures and harriet beecher stowe s uncle tom s cabin such texts smith finds highlight many of the then current ideas about the extremes of political expression her readings support the conclusions that the value of rational argument itself was contested that the emergent enlightenment rationalism may have helped to sterilize political debate and that storytelling or testimony posed an important challenge to the norm of political rationality smith explores facets of the political culture in ways that make sense of traditions from whiggish resistance to protestant narrative testimony she helps us to understand such puzzles as the point of mob action and other ritualistic disruptions of the political process our simultaneous attraction to and suspicion of political debates and the appeal of stories by and about victims of injustice also found in her book are keen analyses of the antebellum press and the importance of oratory and public speaking smith shows that alternatives to reasoned deliberation like protest resistance and storytelling have a place in politics such alternatives underscore the positive role that interest passion compassion and even violence might play in the political life of america her book therefore is a cautionary analysis of how rationality came to dominate our thinking about politics and why its hegemony should concern us ultimately smith reminds the reader that democracy and reasoned public debate are not synonymous and that the linkage is not necessarily a good thing

as ethnic racial religious and gender based groups demand rights to pursue radically diverse lifestyles or maintain their cultural traditions conflict seems inevitable even in a free society government may offer remedies to social dilemmas such as affirmative action curbs on immigration or protection of gay rights but these may only fan the flames of resentment yet any society that tolerates and protects diversity is more likely to preserve the freedom to live one's life without interference emily gill reexamines the liberal tradition to reconcile its core commitments to autonomy and diversity values that in theory are complementary but in practice are often at odds and to show that the interaction of these values determines how we as individuals become free in becoming free she argues that true freedom is enhanced through the promotion of diversity and the encouragement of rational reflection on the options it allows and that limited choice or ignorance diminishes such freedom yet an incomplete freedom is what many individuals groups and states advocate when they commit to particular cultural traditions or religious beliefs despite the autonomy they themselves enjoy gill traces the implications of these conflicting views by drawing on recent scholarship and legal decisions in six areas national citizenship cultural membership ethnicity and gender religious belief sexuality and civic education by exploring the tensions between autonomy and diversity in such instances as boy scouts membership restrictions gay rights legislation and education among the amish she not only offers an insightful commentary on current issues but also explores the moral foundations of liberal thought unlike those who criticize liberalism for its shallow philosophical grounding gill shows it to have a substantive moral content grounded in the individual's capacity to make rational decisions based on critical reflection in her tightly woven arguments she explores real world problems in a meaningful way for students and for anyone concerned with the future of liberalism showing that becoming free is an ongoing process of human and social development

in 1992 nepal created democratically elected bodies at district and village levels the objective was to make local government more attentive to people's needs and more capable of planning and implementing development activities john martinussen reviews the new policies on decentralization in nepal and investigates how and to what extent they have so far been implemented this is the first analysis of the new democratic set up in nepal as seen from the perspective of both local authorities and the people themselves
