in the first half of the twentieth century the rationalist tide had reached its high mark in the arts politics and work but the holocaust the gulag and other failures have dimmed the popularity of rationalism however the evidence of those practical failures would not have been as convincing as it was if not for the existence of a theoretical diagnosis of the malady this book compares and contrasts the ideas of some of the leading twentieth century critics of rationalism hans georg gadamer f a hayek aurel kolnai alasdair macintyre michael oakeshott michael polanyi gilbert ryle eric voegelin and ludwig wittgenstein while each can be seen as a critic of rationalism were they each attacking the same thing in what senses did their analyses overlap and in what senses did they differ clarifying these issues this book will provide important insights into this major intellectual trend of the past century by including these major thinkers tradition v rationalism we see that that these thinkers believed that tradition should still have a place in the world as a repository of wisdom as our lives becomes increasingly dominated by various forms of rationalisms whether political technological economic or cultural we need to ask ourselves whether this is the type of world in which we want to live and if not how can we critique and propose an alternative to it the thinkers in this book provide us a starting point on our journey towards thinking about how we can have a more hopeful humane and brighter future

should the arts receive public support can the arts survive in a modern capitalist society can economics shed light on the nature of public support and whether there is a rationale for public intervention this book undertakes to examine these questions as it explores the ways government and public resources are used to support the arts this book applies a veblenian approach to understanding economic development to investigate public support for the arts in an effort to determine whether this approach can elucidate economic rationales for public support divided into three parts the first provides basic information on public support for the arts by surveying support in the united states and australia part two includes a neoclassical overview of the topic while part three presents veblen s ideas on economic development this book will be of interests to researchers concerned with cultural and institutional economics as well as political economy

suicide for years has been a public health crisis in the western world yet more and more states and countries are allowing physician assisted suicide or euthanasia have you wondered whether it is actually wrong to end your life if you are mortally ill susan windley daoust engages in an extended discussion with a game dialogue partner who thinks that there are five good reasons to employ physician assisted suicide and proves those common reasons or tricks of the heart may be well intended but make no moral or spiritual sense she argues that pas is based in medical ignorance a utilitarian understanding of the human and a spiritual vacuum and the christian church needs to engage these realities quickly and directly by recovering the art of dying well this book is written to all those considering the issue from those considering pas as an option in their own lives to those called upon to vote on the legality of pas in their states to those who minister to the dying

the political systems of the roman republic were based almost entirely on tradition the way of the ancestors rather than on a written constitution while the founders of the american republic looked to ancient rome as a primary model for their enterprise nevertheless in line with the rationalist spirit of their age the american founders attempted to create a rational set of rules that would guide the conduct of american politics namely the us constitution these two examples offer a striking case of the ideal types famously delineated by michael oakeshott in rationalism in politics and elsewhere between politics as a practice grounded in tradition and politics as a system based on principles flowing from abstract reasoning this book explores how the histories of the two republics can help us to understand oakeshott s claims about rational versus traditional politics through examining such issues we may come to understand better not only oakeshott s critique of rationalism but also modern constitutional theory issues in the design of the european union and aspects of the revival of republicanism

issued in 3 sections covering the 50 states and the district of columbia arranged alphabetically

ours is an era when human genes can be copied and patented from genetically modified foods to digital piracy the concept of intellectual property ip and the laws upholding it play a foundational role in our society but its political and ideological dimensions have rarely been understood outside of specialist circles this collection cuts through the legal jargon that so often surrounds ip to provide both a comprehensive history and analysis that explores the corporate interests that shape its conception and the movements that are developing alternatives as the nature of industry changes we might ask what are the wider implications of the concept of ip be it for agribusiness and pharmaceutical companies or the film and music industries has ip law been used to safeguard and assert the ownership of ideas and creativity or is it an essential foundation of our culture today with mounting challenges from the growth of free software and open source movements this collection provides an accessible and alternative guide to ip exploring its significance within the wider struggle between capital and the commons

originally published in 1973 by macmillan this probing book examines the uses control and consequences of technology in a world which must either take realistic stock of its obsession with unbridled progress and individual freedom or perish in its excesses co published with the center for the study of values university of delaware

the government the media hmos and individual americans have all embraced programs to promote disease prevention yet obesity is up exercise is down teenagers continue to smoke and sexually transmitted disease is rampant why these intriguing essays examine the ethical and social problems that create subtle obstacles to changing americans unhealthy behavior the contributors raise profound questions about the role of the state or employers in trying to change health related behavior about the actual health and economic benefits of even trying and about the freedom and responsibility of those of us who as citizens will be the target of such efforts they ask for instance whether we are all equally free to live healthy lives or whether social and economic conditions make a difference do disease prevention programs actually save money as is commonly argued what is the moral legitimacy of using economic and other incentives to change people s behavior especially when as with hmos the goal is to control costs one key issue explored throughout

the book is the fundamental ambivalence of traditionally libertarian americans about health promotion programs we like the idea of good health but we do not want government or others posing threats to our personal lifestyle choices the contributors argue that such programs will continue to prove less than wholly successful without a fuller examination of their place in our national values
