where great science and great teaching meet this book provides rich coverage of the foundational topics taught for introductory psychology the author make the material meaningful and memorable for students each major section of every chapter is organized around a single core concept the core concepts allow readers to draw connections across the chapter and to see the big picture of psychology learning is then reinforced through focused application and critical thinking activities

in this version of psychology twelfth edition david myers and nathan dewall break down the new edition s 16 chapters into 53 modules assignable in any sequence and brief enough to be read in one

sitting it s a format favored by a wide range of students and instructors one that s supported by substantial research showing that students working with shorter reading assignments develop a deeper understanding of the material the new edition of modules includes the same new features and content of psychology twelfth edition including hundreds of new citations and new infographics and like psychology twelfth edition is more than ever a fully integrated text media learning package with the modular edition s launchpad now featuring dozens of new concept practice activities

like its predecessors volume iii of the handbook for teaching introductory psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom it contains an organized collection of articles from teaching of psychology top the official journal of the society for the teaching of psychology division 2 of the american psychological association volume iii contains 89 articles from top that have not been included in other volumes another distinction between this volume and its predecessors is its emphasis on testing and assessment the book is divided into two sections section one issues and approaches in teaching introductory psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty section two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline this section is organized so as to parallel the order of topics found in most introductory psychology textbooks intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the society for the teaching of psychology to promote its activities to further improve the teaching of psychology

how can psychology professors in the usa and other nations make their courses more international this question is addressed in this indispensable new sourcebook co authored by 73 contributors and editors from 21 countries in recent decades psychology has evolved from an american dominated discipline to a much more global discipline preliminary estimates by zoma and gielen 2015 suggest that approximately 76 78 of the world s one million or so psychologists reside outside the u s however most textbooks in the field continue to rely predominantly on research conducted in north america and europe our book is intended to introduce psychology instructors to a variety of broad perspectives as well as specific suggestions that can support their efforts to internationalize their course offerings at both the undergraduate and graduate levels in this way they can prepare their students to become more culturally sensitive and function more effectively as citizens and psychologists in the evolving globalized world to achieve these ambitious goals the editors have assembled an international group of 73 distinguished contributors who taken together have taught and conducted research in all regions of

the world the chapters in the book include both core areas of psychology and subdisciplines that represent rapidly expanding and internationally important areas such as cross cultural psychology and the psychology of gender the chapters cover key topics and areas included in the course offerings of psychology departments both in the united states and in other countries in addition to a discussion of international perspectives relevant to a given area all chapters include an annotated bibliography of pertinent books articles web related materials films videos and so on based on this information both highly experienced and less experienced psychology instructors can add globally and culturally oriented dimensions to their respective courses this is important because universities departments and accrediting agencies increasingly put pressure on instructors to broaden and internationalize their courses as a long time international psychologist myself i see this bold new volume as a great leap forward for international psychology the 73 distinguished contributors and editors from 21 countries have carefully crafted a handbook that will be the go to resource on the topic for years to come for psychology to continue to be relevant in the 21st century it must become more international i am grateful this book will help us accomplish this challenging but rewarding goal philip g zimbardo ph d past president american psychological association what could be more important than understanding human behavior and the thoughts and emotions that underlie it by teaching psychology to the world we offer the possibility of using our discipline to create a better future for all of us the chapters in this excellent book help teachers of psychology move from an ethnocentric perspective to a global way of thinking about and telling about a truly international psychology diane f halpern ph d past president of the american psychological association and professor of psychology this is a brilliant unprecedented collection of international scholarship that every psychology professor and student should read the 21st century in the teaching of psychology has truly arrived with this book creating a thoroughly needed international focus for our pedagogy frank farley ph d l h carnell professor temple university former president american psychological association apa international council of psychologists american educational research association aera and the society for international psychology division 52 of apa internationalizing teaching of psychology contains chapters authored by eminent psychologists of diverse cultural background inclusive of different cultural perspectives on range of topics of contemporary importance thus the volume integrates research emanating from varied cultural contexts facilitating development of a truly universal psychological science the volume is a major resource for teaching courses on cultural cross cultural global psychology and in enhancing internationalization of psychology prof janak pandey university of allahabad india editor psychology in india the state of the art all involved in the training of psychologists will want to recommend this book which thoroughly presents an international perspective on the teaching of psychology rich gielen and takooshian consider the basic nature of psychology at the same time emphasizing cultural differences and relating it all to real life as expert cross cultural researchers the contributors provide a much needed resource and up to date reference for psychologists and students as well as for any scholar interested in our discipline around the globe laura hernández guzmán ph d professor of psychology universidad nacional autónoma de méxico past president of the mexican psychological

society since the mid twentieth century the world has become an increasingly smaller place at least in the figurative sense and yet western psychology has been slow to grasp the culturally limited scope of much of our science although the movement toward a more culturally inclusive psychology had its roots at least as early as the 1960s more recent meta analyses have shown that a large percentage of the psychological literature has represented a small percentage of the world s population in internationalizing the teaching of psychology grant rich uwe gielen and harold takooshian are making a noteworthy effort to inform and support teachers who would move the field toward a psychology of all people from advice about getting involved in international psychology to stand alone international psychology courses to the problems of culture bound specialized courses these well traveled and experienced editors have assembled a resource that psychology teachers will find both interesting and valuable kenneth d keith president society for the teaching of psychology university of san diego this volume is a positive contribution to the internationalization of the psychology curriculum given the very large numbers of psychology undergraduate and graduate students across the world such internationalization has significant potential to provide learners with opportunities to better understand the similarities and differences in the behavior of humans in different local national and international contexts such understanding can lead to a greater appreciation of and perhaps respect for and celebration of these similarities and differences thus potentially leading to actions that reduce global human suffering this volume should become an indispensable tool for psychology educators interested in such outcomes jacquelyn cranney psychology unsw sydney australia this book is a necessity given the increasing mobility of psychologists use of technology in psychology practice and need to regulate the psychology profession globally the content in this book will go a long way to improve psychological literacy in our east and central africa region i chaired the first ever east and central african regional psychology conference in uganda in 2013 and am on the board of directors of the international association of applied psychologists iaap so am keenly aware that the internationalization of scientific psychology knowledge and skills is an imperative james kagaari ph d president uganda council of psychologists teaching psychology in your own country especially when it is a country as vast and diverse as the united states where fewer than half its citizens hold a passport makes it all too easy to give courses in which students come away with the impression that what psychological scientists have learned about behavior and mental processes at home applies equally in the rest of the world that is not always the case of course and the chapters in this valuable volume serve not only to remind us of that fact but to stimulate us to consider adjusting the content of our courses to make them as they should be more international in scope douglas bernstein courtesy professor of psychology university of south florida usa bravo to this all star cast of international contributors for showing us how to help students appreciate both our cultural diversity and our human kinship and for providing us with accessible articles books media and online materials for teaching every area of psychology from a more international perspective david g myers hope college co author psychology 12th edition and social psychology 12th edition imagine that you convened an invitation only panel of 73 experts from around the world and asked that they guide the profession in internationalizing the

what is psychology all about this accessible book presents a review of the key areas of the subject as it is traditionally taught and provides the reader with an introduction to important concepts and findings within each of these the reader should be able at least to make sense of most psychological topics

islamic psychology or ilm an nafs science of the soul is an important introductory textbook drawing on the latest evidence in the sub disciplines of psychology to provide a balanced and comprehensive view of human nature behaviour and experience its foundation to develop theories about human nature is based upon the writings of the qur an sunna muslim scholars and contemporary research findings synthesising contemporary empirical psychology and islamic psychology this book is holistic in both nature and process and includes the physical psychological social and spiritual dimensions of human behaviour and experience through a broad and comprehensive scope the book addresses three main areas context perspectives and the clinical applications of applied psychology from an islamic approach this book is a core text on islamic psychology for undergraduate and postgraduate students and those undertaking continuing professional development in islamic psychology psychotherapy and counselling beyond this it is also a good supporting resource for teachers and lecturers in this field

this book examines the human proclivity to resist changing our beliefs drawing on psychological neurological and philosophical research and integrating topics as wide ranging as emotion cognition social and physical context and learning theory lao and young explore why this resistance to change impedes our learning and progression they also suggest that failure to adapt our beliefs to available and informed evidence can incur costs that may be seen in personal growth politics science law medicine education and business resistance to belief change explores the various manifestations of resistance including overt discursive and especially inertial forms of resistance as well as the influential factors that can impact upon them the book also examines how the self directed learner as

well as teachers may structure the learning experience to overcome resistance and facilitate progressive and adaptive learning. Lao and Young find that the impediments to learning and resistance to change are far more prevalent and costly than previously suggested in research and so this book will be of interest to a range of people in cognitive development, social psychology and clinical and educational psychology.

The new edition of *Exploring Psychology* offers outstanding currency on the research practice and teaching of psychology. Myers and DeWall inspire students with fascinating findings and applications, effective new study tools and technologies and a compassionate and compelling storytelling voice. Their presentation is based on the same guiding principles behind the entire family of textbooks that have made David Myers the world's bestselling introductory psychology author: facilitate learning by teaching critical thinking and helping students at every step present psychology as a science emphasizing the process of inquiry and putting facts in the service of concepts. Make sure students come away with an appreciation of psychology's big ideas and with a deeper respect for humanity. What drives us, distinguishes us, unifies us. This *Exploring Psychology* is the first to include Myers' handpicked co-author Nathan DeWall. DeWall shares Myers' belief that instilling a sense of curiosity and inquiry about psychological science is an effective way to help students navigate the content, think critically and prepare for a lifetime of learning and living. The extraordinary long-time Myers ancillary author team is also here. A group whose teamwork consistency and commitment again sets the industry standard for instructor and student supplements. The high quality that consistently sets Myers' ancillaries apart sees a new incarnation in *Launchpad*. This course space organizes all the book's digital resources in an online format that makes it easier for instructors to teach, track and assess their students.

Just in time for the film version of *Regeneration* by Pat Barker starring Jonathan Pryce, which Rivers holds a pivotal place in the development of neurophysiology, psychiatry, psychology and anthropology, but he is probably most widely known for his wartime association with Siegfried Sassoon and Robert Graves. In addition to describing the important first world war years, this biography examines Rivers's contributions to science and his early association with Lewis Carroll, whom his father treated for a stammer. A fresh introduction and glossary have been provided along with a thought-provoking selection of Rivers's writing.
